Weak Signals For Strategic Intelligence Anticipation Tool For Managers:

Weak Signals for Strategic Intelligence Humbert Lesca, Nicolas Lesca, 2013-01-09 The expression We did not see it coming has often been heard in recent years from decision makers at the highest levels of responsibility in the private and public sectors Yet there were actually early warning signals but they were often ignored or not used due to a lack of appropriate methodology To avoid such blind spots this book provides answers to the question how to anticipate The concept of a weak signal is at the heart of the proposed methods After presenting examples of this concept the authors provide original and validated answers to questions of feasibility How to recognize a weak signal How to exploit it Numerous applications are presented

Strategic Intelligence for the Future 1 Henri Dou, Alain Juillet, Philippe Clerc, 2019-04-30 Information in all its forms is at the heart of the economic intelligence process It is also a powerful vector of innovation and more than ever a balance between economic and societal forces Strategic Intelligence for the Future 1 analyzes the need for the French economic intelligence to mutate in order to develop the economy strengthen social cohesion and protect vital interests This mutation requires a change of attitudes and a new way of thinking widely open to global change and new technologies The focus of the French economic intelligence on conventional objectives such as business and the economy does not allow for the integration of its multiple possible fields and thus its global nature The strategy foresight and temporal dynamics necessary to the understanding of the world and the new balance of power and control of complex situations have thus increased the time needed to put this in place Both theoretical and practical this book provides a basis from which to develop enhanced economic intelligence leading to the implementation of global security

Strategic Intelligence for the Future 2 Henri Dou, Alain Juillet, Philippe Clerc, 2019-04-30 Information in all its forms is at the heart of the economic intelligence process It is also a powerful vector of innovation and more than ever a balance between economic and societal forces That is why a large part of Strategic Intelligence for the Future 2 analyzes the various aspects of information from traditional processing and research to the psychological and epigenetic aspects of its development This leads to a new vision of its integration into organizations In addition new technologies offer extensive access to information including social networks which are critically analyzed here In a complex world where geopolitics and the new concept of information warfare are becoming increasingly important it becomes imperative to better apprehend and understand our environment in order to develop critical thinking that will reinforce the different global aspects of security in economic intelligence

Scenarios as a Tool to Give Context and Sense to Weak Signals in a Process of Competitive Intelligence Paulo Miguel Nunes Soeiro de Carvalho, 2010 This research work aims to demonstrate that in a highly turbulent and uncertain context companies must take into account the weak signals sent by obtained in the environment internal and external to the organization and that this type of information must be managed and framed in a process of competitive intelligence The first section of the Thesis will form the theoretical and conceptual basis of the research offering the necessary background for a more specific and focused research work aiming at exploring if and how scenarios can be used as a tool to facilitate the interpretation and to give sense to weak signals in a corporate environment After the theoretical and conceptual foundations of this research work we make a comparative and critical analysis of conceptual models and processes of competitive intelligence giving a particular attention to the stages and approaches related to the amplification interpretation and sense making of weak signals Our contribution

intends to focus on the design of a conceptual framework and experimentation of a process second part of the Thesis
Therefore we propose a generic framework and a specific procedure which allows the identification of Weak Signals in an environmental scanning phase and then the exploration of the impact and meaning of those Weak Signals in a set of alternative scenarios according to the strategic focus defined in each experiment Here the scenarios assume a crucial role as alternative contexts where the Weak Signals can be interpreted In the third part of the Thesis we present the theoretical and operational propositions and also a general prescription which tries to highlight and integrate in a systemic way some of the conclusions that we ve reached in this research resulting from the confrontation of the theoretical enquiry with the experiments made
