Build a Text-to-Image Generator (from Scratch) Mark Liu, 2026-01-13 This book takes you step by step through creating your own AI models that can generate images from text. You'll explore two methods of image generation vision transformers and diffusion models and learn vital AI development techniques as you go. Dive into the powerful models behind AI image generators. The best way to learn is to build something from scratch and in this book you'll build your very own diffusion model and vision transformer. As you work through each stage of development you'll develop an understanding of how these models can be customized applied and integrated for impressive multimodal AI. Build a Text to Image Generator from Scratch teaches you how to Build and train models to generate high resolution images based on text descriptions. Edit an existing image based on text prompts. Build and train a model to add captions to images. Build and train a vision transformer to classify images. Fine tune LLMs for downstream tasks such as classification text or image generation. Better differentiate real images from deepfakes. About the technology AI generated images appear everywhere from high end advertising to casual social media feeds. Text to image tools like Dall-e, Midjourney and Flux make it easy to create AI art but how do they work? In this book you'll find out by building your own text to image generator. About the book Build a Text to Image Generator from Scratch explores both transformer based image generation and diffusion models. You'll work hands on to build a pair of simple generation models that can classify images automatically add captions reconstruct images and enhance existing graphics. Author Mark Liu guides you every step of the way with clear explanations informative diagrams.
