the sea change that AI brings can be paralyzing. How should companies set strategies, governments design policies and people plan their lives for a world so different from what we know? In the face of such uncertainty, many either cower in fear or predict an impossibly sunny future. But in *Prediction Machines*, three eminent economists recast the rise of AI as a drop in the cost of prediction. With this masterful stroke, they lift the curtain on the AI as magic hype and provide economic clarity about the AI revolution as well as a basis for action by executives, policy makers, investors and entrepreneurs. In this new updated edition, the authors illustrate how when AI is framed as cheap prediction, its extraordinary potential becomes clear. Prediction is at the heart of making decisions amid uncertainty. Our businesses and personal lives are riddled with such decisions. Prediction tools increase productivity, operating machines, handling documents, communicating with customers. Uncertainty constrains strategy. Better prediction creates opportunities for new business strategies to compete. The authors reset the context, describing the striking impact the book has had and how its argument and its implications are playing out in the real world. And in new material, they explain how prediction fits into decision making processes and how foundational technologies such as quantum computing will impact business choices. Penetrating insightful and practical Prediction Machines will help you navigate the changes on the horizon.

Part Two: Software Agents and Internet Computing; Human Computer Interaction; and Enterprise Architecture.

Proceedings of the 2025 5th International Conference on Informatization Economic Development and Management (IEDM 2025) Meilin Zhang, Au Yong Hui Nee, Khurram Shehzad, Sameer Kumar, Ehsan Javanmardi, 2025-06-26. This is an open access book. Building on the successes of previous editions, IEDM 2025 aims to delve deeper into the practical applications and strategic implications of emerging information technologies. Unlike prior conferences that primarily focused on theoretical frameworks and initial empirical findings, this year's event will emphasize actionable insights, case studies, and innovative practices that demonstrate the tangible benefits and challenges of digital integration in various economic sectors. The primary objective of IEDM 2025 is to provide a multidimensional platform for cross-disciplinary dialogue, fostering collaboration and knowledge exchange among academia, industry leaders, and policymakers. By highlighting cutting-edge research and successful implementations, the conference aims to inspire new approaches to leveraging information technology for sustainable economic growth and efficient management practices. Special attention will be given to discussing the role of digital transformation in enhancing productivity, driving innovation, and addressing socio-economic disparities.
