## Facebook Reddit Today:

*Inventing the Cloud Century* Marcus Oppitz, Peter Tomsu, 2017-08-03 This book combines the three dimensions of technology society and economy to explore the advent of today's cloud ecosystems as successors to older service ecosystems based on networks. Further, it describes the shifting of services to the cloud as a long-term trend that is still progressing rapidly. The book adopts a comprehensive perspective on the key success factors for the technology compelling business models and ecosystems, including private, public, and national organizations. The authors explore the evolution of service ecosystems, describe the similarities and differences, and analyze the way they have created and changed industries. Lastly, based on the current status of cloud computing and related technologies like virtualization, the Internet of Things, fog computing, big data, and analytics, cognitive computing, and blockchain, the authors provide a revealing outlook on the possibilities of future technologies, the future of the Internet, and the potential impacts on business and society. *Lurking*

Joanne McNeil, 2020-02-25 One of Esquire's Best Books to Elevate Your Reading List in 2020 and a OneZero Best Tech Book of 2020. Named one of the 100 Notable books of 2020 by the End of the World Review. A concise but wide-ranging personal history of the Internet from for the first time the point of view of the user. In a shockingly short amount of time, the Internet has bound people around the world together and torn us apart and changed not just the way we communicate but who we are and who we can be. It has created a new unprecedented cultural space that we are all a part of, even if we don't participate; that is how we participate but by which we're continually surprised, betrayed, enriched, befuddled. We have churned through platforms and technologies and in turn been churned by them. And yet the Internet is us and always has been. In *Lurking*, Joanne McNeil digs deep and identifies the primary if sometimes contradictory concerns of people online: searching, safety, privacy, identity, community, anonymity, and visibility. She charts what it is that brought people online and what keeps us here, even as the social equations of digital life, what we're made to trade knowingly or otherwise for the benefits of the Internet, have shifted radically beneath us. It is a story we are accustomed to hearing as tales of entrepreneurs and visionaries and dynamic and powerful corporations, but there is a more profound, intimate story that hasn't yet been told. Long one of the most incisive, ferociously intelligent, and widely respected cultural critics online, McNeil here establishes a singular vision of who we are now, tells the stories of how we became us, and helps us start to figure out what we do now.
