[GPU Parallel Program Development Using CUDA](#) Tolga Soyata,2018-01-19 GPU Parallel Program Development using CUDA teaches GPU programming by showing the differences among different families of GPUs This approach prepares the reader for the next generation and future generations of GPUs The book emphasizes concepts that will remain relevant for a long time rather than concepts that are platform specific At the same time the book also provides platform dependent explanations that are as valuable as generalized GPU concepts The book consists of three separate parts it starts by explaining parallelism using CPU multi threading in Part I A few simple programs are used to demonstrate the concept of dividing a large task into multiple parallel sub tasks and mapping them to CPU threads Multiple ways of parallelizing the same task are analyzed and their pros cons are studied in terms of both core and memory operation Part II of the book introduces GPU massive parallelism The same programs are parallelized on multiple Nvidia GPU platforms and the same performance analysis is repeated Because the core and memory structures of CPUs and GPUs are different the results differ in interesting ways The end goal is to make programmers aware of all the good ideas as well as the bad ideas so readers can apply the good ideas and avoid the bad ideas in their own programs Part III of the book provides pointer for readers who want to expand their horizons It provides a brief introduction to popular CUDA libraries such as cuBLAS cuFFT NPP and Thrust the OpenCL programming language an overview of GPU programming using other programming languages and API libraries such as Python OpenCV OpenGL and Apple s Swift and Metal and the deep learning library cuDNN

Corporate Innovation Donald F. Kuratko, Michael G. Goldsby, Jeffrey S. Hornsby, 2025-01-29

Whether you want to become a successful innovator within your organization or develop an environment that spawns an innovative mindset, Corporate Innovation 2nd edition can be helpful to you. Accomplished entrepreneurs create successful new ventures and implement them successfully. To do this consistently takes a blend of entrepreneurship, creativity, innovation and knowing how to make teams work effectively. The concepts behind corporate innovation mirror many of these same principles. This revised edition will help you develop an understanding of an innovative organization, the specific processes involved in corporate innovation and how to assess your organization's readiness for entrepreneurial activity and innovation. It will help you learn how to get more ideas successfully to market and how to write effective innovation plans for the implementation of innovative ideas. As opposed to simply entrepreneurship or technology entrepreneurship, the principal focus of this book is new product and service innovations developed inside existing organizations. What distinguishes structures for innovation from the processes for innovation will be explored. The corporate innovation process chapter examines the various stage gate and other non linear models in the new product development literature. Finally, since it is about disruption in today's industries, we explore the outcomes that are being accelerated and specify the kinds of metrics that are involved. Corporate Innovation 2nd edition helps you to understand innovation by explaining the four stages of the innovation process, how to improve your skills in the innovation process and unleash your personal innovative abilities. In addition, you will find ways to assess the organization's attitudes toward innovation, giving you

insights into how to diagnose creative and innovative performance barriers in the organization Essential reading for students of corporate innovation corporate ventures corporate strategy or human resources this book also speaks to the specific needs of active managers charged with the expectation of enhancing the innovative prowess of their organization Instructors outlines lecture slides and a test bank round out the ancillary online resources for this title **Business 2.0** ,2004-07
