communications it is safe to say we have been unable to predict what happens next When computers first appeared nearly seventy five years ago primitive computer models were used to help understand and plan cities but as computers became faster smaller more powerful and ever more ubiquitous cities themselves began to embrace them As a result the smart city emerged In The Computable City Michael Batty investigates the circularity of this peculiar evolution how computers and communications changed the very nature of our city models which in turn are used to simulate systems composed of those same computers Batty first charts the origins of computers and examines how our computational urban models have developed and how they have been enriched by computer graphics He then explores the sequence of digital revolutions and how they are converging focusing on continual changes in new technologies as well as the twenty first century surge in social media platform economies and the planning of the smart city He concludes by revisiting the digital transformation as it continues to confound us with the understanding that the city now a high frequency twenty four hour version of itself changes our understanding of what is possible
