**Textiles, Identity and Innovation: In Touch** Gianni Montagna, Manuela Cristina, Paulo Carvalho, Figueiredo, 2020-05-19. D\_Tex is proposed as a hub around which it is possible to look at textiles in their different forms in order to better understand, study, adapt and project them for the future. It is intended to build a flow of ideas and concepts so that participants can arrive at new ideas and concepts and work them in their own way, adapting them to their objectives and research. D\_Tex is intended as a space for sharing and building knowledge around textile material in order to propose new understandings and explorations. Present in all areas of knowledge, the textile material bets on renewed social readings and its evolutions to constantly reinvent itself and enable innovative cultural and aesthetic dimensions and unexpected applications to solve questions and promote new knowledge. D\_Tex proposes to promote discussion and knowledge in the different areas where textiles, with all their characteristics, can ensure an important contribution combining material and immaterial knowledge, innovative and traditional techniques, technological and innovative materials and methods, but also new organization and service models, different concepts and views on teaching. With the renewed idea of the intrinsic interdisciplinarity of design and sharing with different areas that support each other, the research and practice of textiles was proposed by the D\_TEX Textile Design Conference 2019 held June 19-21, 2019 at the Lisbon School of Architecture of the University of Lisbon, Portugal, under the theme In Touch, where, as broadly understood as possible, different areas of textiles were regarded as needing to keep in touch with each other and end users in order to promote and share the best they can offer for the welfare of their users and
