The Data Warehouse Toolkit Ralph Kimball,1996-02-16 one of the definitive books of our industry If you take the time to read only one professional book make it this book W H Inmon One of the most dramatic new developments in database design the dimensional data warehouse is a powerful database model that significantly enhances managers ability to quickly analyze large multidimensional data sets Written by the leading proponent of this revolutionary new approach this valuable book CD toolkit outfits you with all the nuts and bolts information you need to design build manage and use dimensional data warehouses for virtually any type of business application as well as software for querying dimensional data warehouses Employing many real life case studies of data warehouses Ralph Kimball provides clear cut guidelines on how to model data and design data warehouses to support advanced multidimensional decision support systems Beginning with the relatively simple example of a data warehouse for a grocery store he progresses step by step through an increasingly complex array of business applications in retail manufacturing banking insurance subscriptions and airline reservations By the end of the book you will have mastered the full range of powerful techniques for creating controlling and navigating dimensional business databases that are easy to understand and navigate On the CD ROM you ll find Software for querying dimensional data warehouses Working models of all the databases described in the book *Advanced Distributed Systems* Felix F. Ramos,2005-09-15 This book constitutes the thoroughly refereed post proceedings of the Fifth International School and Symposium on Advanced Distributed Systems ISSADS 2005 held in Guadalajara Mexico in January 2005 The 50 revised full papers presented were carefully reviewed and selected from over 100 submissions The papers are organized in topical sections on database systems distributed and parallel algorithms real time distributed systems cooperative information

Traunmüller,2003-08-02 th 2002 DEXA the 13 International Conference on Database and Expert Systems Applications was

held on September 2 6 2002 at the Universit Aix Marseille II France The quickly growing field of information systems

required the establishment of more specialized discussion platforms the DaWaK conference EC Web conference eGOV

conference and DEXA workshops and there were held in parallel with DEXA also in Aix en Provence The resulting book was

prepared with great effort Starting with the preparation of submitted papers the papers went through the reviewing process

The accepted papers were revised to final versions by their authors and arranged to the conference program This year 241

papers were submitted and our thanks go to all who have contributed The program committee and the supporting reviewers

produced altogether about 730 referee reports on average three reports per paper and selected 89 papers for presentation

The papers presented here encompass the extensive domain of databases together with the other conferences and workshops

of the DEXA event cluster a vast part of applied computer science was covered In this way DEXA has blazed the trail At this

point we would like to acknowledge to all institutions which actively supported this conference and made it possible These
