*Resources in Education*, 1998    **Handbook of Strategies and Strategic Processing** Daniel L. Dinsmore, Luke K. Fryer, Meghan M. Parkinson, 2020-01-27

Handbook of Strategies and Strategic Processing provides a state of the art synthesis of conceptual measurement and analytical issues regarding learning strategies and strategic processing. Contributions by educational psychology experts present the clearest yet definition of this essential and quickly evolving component of numerous theoretical frameworks that operate across academic domains. This volume addresses the most current research and theory on the nature of strategies and performance mechanisms for unearthing individuals strategic behaviors and both long established and emerging techniques for data analysis and interpretation.

*Learning foreign languages: experiences of persons with disabilities and special educational needs and their teachers* Ewa Domagala-Zysk, Jitka Sedláčková, Katarzyna Karpińska-Szaj, 2025-09-22

In many parts of the world it is not a person's native language but a foreign one which is used for education, work or entertainment. This is true for many European countries whose inhabitants need to learn English as a foreign language if they want to participate in education or among diverse fields in the workforce. In other parts of the world it might be Spanish, Hindi, Mandarin, Chinese, Arabic or other languages which will be serving a similar role. This need for learning a second language is understood well in many educational programs including those for students with special educational needs. However, to date there is not much research of the experiences of persons with diverse additional needs as learners of foreign languages. The most robust literature covers the field of additional language acquisition among Deaf and Hard of Hearing (DHH) people (cf. Domagała, Zyłk Podlewska, Moritz, 2021) and others. Goals, methods and forms of teaching are fairly well described and DHH students' needs have been documented extensively.

**Communication and Swallowing Changes in Healthy Aging Adults** Angela Burda, 2010-10-22

Communication and Swallowing Changes in Healthy Aging Adults compiles and presents the available research on healthy aging adults' performance and abilities in the following areas: auditory comprehension, reading comprehension, speaking, writing, voice and motor speech abilities, cognition and swallowing. This text also presents principles from the World Health Organization's International Classification of Functioning, Disability and Health and its applications to aging adults. One of the first texts to cover these principles, this book will address the need for a comprehensive view of communication and swallowing issues in aging for students of speech language pathology. Speech language pathologists will learn how to fully compare what would be considered normal for their elderly patients rather than overestimating or underestimating what aging adults are capable of doing. Knowing what would be considered within the spectrum of normal will help speech language pathologists to address therapy as effectively as possible. Having this information at hand is particularly important as the nation's population is aging at a rapid rate and there is a need for evidence based practice in speech language pathology. Written in an easy to follow format, Communication and Swallowing Changes in Healthy Aging Adults includes original

research data discussion questions and a list of Quick Facts at the end of each chapter to summarize key points This text will serve as a useful resource as students see elderly clients in on campus speech and hearing clinics and when they intern at hospitals and long term care facilities Instructor Resources PowerPoint Slides and an Image Bank Testimonial

Communication and Swallowing Changes in Healthy Aging Adults is a handy text portable and logically organized The information is easy to follow complimented by information presented in tables charts This text would be helpful to a practicing therapist when making a differential diagnosis between a normal vs atypical aging process Communication and Swallowing Changes in Healthy Aging Adults would be an appropriate text for courses in Communications Disorders Departments for graduate students in a neuro course or a neurogenic communication disorders course and in lifespan development courses as in the field of Psychology and Gerontology Susan Durnford M S CCC SLP Clinical Assistant Professor Department of Speech Language Pathology Audiology Ithaca College     *Oxford Handbook of Deaf Studies, Language, and Education* Marc Marschark Professor at the National Technical Institute of the Deaf at Rochester Institute of
