As the computer industry moves into the 21st century, the long running *Advances in Computers* is ready to tackle the challenges of the new century with insightful articles on new technology just as it has since 1960 in chronicling the advances in computer technology from the last century. As the longest running continuing series on computers, *Advances in Computers* presents those technologies that will affect the industry in the years to come. In this volume, the 53rd in the series, we present 8 relevant topics. The first three represent a common theme on distributed computing systems using more than one processor to allow for parallel execution and hence completion of a complex computing task in a minimal amount of time. The other 5 chapters describe other relevant advances from the late 1990s with an emphasis on software development topics of vital importance to developers today: process improvement, measurement and legal liabilities. Longest running series on computers. Contains eight insightful chapters on new technology. Gives comprehensive treatment of distributed systems. Shows how to evaluate measurements. Details how to evaluate software process improvement models. Examines how to expand e-commerce on the Web. Discusses legal liabilities in developing software. A must read for developers.

Building World ,1903 **Texas Instruments Technical Journal** ,1994 *Returning Migrant Workers* United Nations. Economic and Social Commission for Asia and the Pacific,1986 The research reports and statements by government representatives contained in this volume were presented at the Policy Workshop on International Migration in Asia and the Pacific held at Bangkok from 15-21 October 1985 The workshop was the final activity of a 2 year Economic and Social Commission for Asia and the Pacific ESCAP project on international migration policy in Asia and the Pacific funded by the UN Fund for Population Activities The 2nd phase of the project includes the studies reported in this volume which were intended to be exploratory They were meant to assess the current state of knowledge regarding return migration and to identify critical issues that would require further investigation 5 of the studies are concerned with return migration from temporary employment primarily in the Middle East Because many of the labor sending countries of the Mediterranean basin experienced a rapid expansion of labor emigration largely to northern and western Europe and a contraction of the flow and increase in return migration prior to current trends in Asian labor migration it was felt that a background paper on that experience would be valuable to policy makers in the ESCAP region Migration from the Pacific sub region of ESCAP is both of

more variable duration and less heavily labor oriented than temporary migration from Asian countries to the Middle East The workshop s objectives were 1 to bring together researchers and policy makers to review carefully the results of the 7 studies carried out as part of the project 2 to relate the research findings to feasible government policies for the reintegration of returning labor migrants and 3 to make and disseminate policy recommendations to governments in the ESCAP region
