Telling Stories with Data Rohan Alexander, 2023-07-27 The book equips students with the end to end skills needed to do data science That means gathering cleaning preparing and sharing data then using statistical models to analyse data writing about the results of those models drawing conclusions from them and finally using the cloud to put a model into production all done in a reproducible way At the moment there are a lot of books that teach data science but most of them assume that you already have the data This book fills that gap by detailing how to go about gathering datasets cleaning and preparing them before analysing them There are also a lot of books that teach statistical modelling but few of them teach how to communicate the results of the models and how they help us learn about the world Very few data science textbooks cover ethics and most of those that do have a token ethics chapter Finally reproducibility is not often emphasised in data science books This book is based around a straight forward workflow conducted in an ethical and reproducible way gather data prepare data analyse data and communicate those findings This book will achieve the goals by working through extensive case studies in terms of gathering and preparing data and integrating ethics throughout It is specifically designed around teaching how to write about the data and models so aspects such as writing are explicitly covered And finally the use

of GitHub and the open source statistical language R are built in throughout the book Key Features Extensive code examples Ethics integrated throughout Reproducibility integrated throughout Focus on data gathering messy data and cleaning data Extensive formative assessment throughout *Podcasting in a Platform Age* John L. Sullivan,2024-01-25 Podcasting in a Platform Age explores the transition underway in podcasting by considering how the influx of legacy and new media interest in the medium is injecting professional and corporate logics into what had been largely an amateur media form Many of the most high profile podcasts today however are produced by highly skilled media professionals some of whom are employees of media corporations Legacy radio and new media platform giants like Google Apple Amazon and Spotify are also making big and expensive moves in the medium by acquiring content producers and hosting platforms This book focuses on three major aspects of this transformation formalization professionalization and monetization Through a close read of online and press discourse analysis of podcasts themselves participant observations at podcast trade shows and conventions and interviews with industry professionals and individual podcasters John Sullivan outlines how the efforts of industry players to transform podcasting into a profitable medium are beginning to challenge the very definition of podcasting itself **Reviews in**
