

Strengths

Strengths are the first element of a SWOT analysis, and it addresses the strengths an organization has currently, representing what it is that a company or project does especially well and how these strengths should be built on in hopes of a stronger future for the organization.

Weaknesses

What are the things holding a project or business back? Weaknesses refer to an organization's internal weaknesses, which are those that interfere with or limit a company's capability to reach its desired future state. Things an organization does not perform well in or needs to improve on are considered to be weaknesses.

Threats

Threats are the final element of a SWOT analysis, and they are any external barriers or forces that prevent a company from reaching its objectives. A threat is anything that poses a risk to either the organization itself or the likelihood of its growth or success.

Opportunities

The third element is opportunities, and these are described as the external factors that an organization is able to benefit from and act upon. Opportunities are realized only once a company makes the decision to act upon them and, therefore, are often the drivers of an organization's growth strategies.
