Timberline Estimating Manual:

Cost Engineering for Effective Project Control Sol A. Ward, 1992-04-16 Provides an integrated overview of methods for controlling the cost schedule and quality of a construction project. It emphasizes project diagnostics and analysis of the patterns of a project and covers estimating, procurement, construction management, planning, CPM, claims and data collection. It also covers the major planning, scheduling and estimating software packages from Primavera G2 Computer Controls Inc, Timberline and others.

Estimating with Timberline Precision Version 5.2 Mark Reich, Jud Youell, 1994 **BIM Handbook**

Charles M. Eastman, 2011-04-19 The BIM Handbook presents the technology and processes behind BIM and how architects, engineers, contractors and sub contractors, construction and facility owners, AECO can take advantage of the new technology and work process. Unlike CAD, BIM is a major paradigm shift in the documentation, work processes and exchange of project information. It facilitates collaboration and further automation in both design and construction. AEC professionals need a handbook to guide them through the various BIM technologies and related processes. The collaborative nature of BIM requires professionals to view BIM from various industry perspectives and understand how BIM supports multiple project participants. The BIM Handbook reviews BIM processes and tools from multiple perspectives: the owner, architects and engineers, contractors, subcontractors and fabricators.

Handbook of Research on Building Information Modeling and Construction Informatics: Concepts and Technologies Underwood, Jason, Isikdag, Umit, 2009-12-31 In recent years, building information modeling has become a very active research area of construction informatics, with investigation of ICT use within construction industry processes and organizations. The Handbook of Research on Building Information Modeling and Construction Informatics: Concepts and Technologies addresses the problems related to information integration and interoperability throughout the lifecycle of a building, from feasibility and conceptual design through to demolition and recycling stages. Containing research from leading international experts, this Handbook of Research provides comprehensive coverage and definitions of the most important issues, concepts, trends and technologies within the field.

Construction Cost Estimating Len Holm, John E. Schaufelberger, 2021-04-07 Construction Cost Estimating equips a new generation of students and early career professionals with the skills they need to bid successfully on projects. From developing bid strategies to submitting a completed bid, this innovative textbook introduces the fundamentals of construction estimating through a real life case study that unfolds across its 24 chapters. Exercises at the end of each chapter offer hands on practice with core concepts such as quantity take offs, pricing and estimating for subcontractor work. Online resources provide instant access to examples of authentic construction documents, including complete, detailed direct work estimates, subcontractor work estimates, general conditions estimates, markups and summary schedules. Through its unique mix of real world examples and classroom tested insights, Construction Cost Estimating ensures that readers are familiar with the entire estimating process even before setting foot on the jobsite.
