**Transfer Pricing for Multinational Enterprises: An integrated Approach** Erik Wintzer, 2003      **Integration Approaches to Group Taxation in the European Internal Market** Ioanna Mitroyanni, 2008-10-13

The creation of a group taxation framework to subject affiliated entities resident in more than one EC Member State to a single set of rules is an experiment without precedent. Group taxation normally deals with tax liability in the context of a single jurisdiction. There is no system of group taxation worldwide which embraces more than one fiscal jurisdiction under a single regulatory umbrella. This thought provoking work explores the prospect for creating a group taxation system extending across national borders in the EC. The objective is to specify what shape the elements of such a system should take as well as to identify the areas of complexity or probable impasse. Among the topics covered: The relevant jurisprudential and legislative framework of the European Internal Market. A survey of the tax systems of Canada, Switzerland and the US with a focus on the principles pertaining to the division of power between the federal and sub federal tiers. The policies for corporate taxation in integrated markets. Administrative concerns: compliance, enforcement, dispute resolution and re assessment of tax liability. Tests for entitlement to group membership. Tax base integration. Territorial delineation of the group and Formulary apportionment. In sum, this book provides valuable insights into an area of significant importance to taxpayers, their advisors and policymakers as well.

**The Allocation of Multinational Business Income: Reassessing the Formulary Apportionment Option** Richard Krever, 2020-02-20

The Allocation of Multinational Business Income: Reassessing the Formulary Apportionment Option. Edited by Richard Krever. Application of formulary apportionment in specific sectors such as digital enterprises and the banking industry. The political economy of establishing and maintaining a successful formulary apportionment regime. Formulary apportionment proposals for Europe. The role of traditional tax criteria such as economic efficiency, fairness, ease of administration and robustness to avoidance and incentive compatibility. Determining which parts of a multinational group are included in a formulary apportionment unit and whether innovative profit split methodologies such as those developed by China are shifting traditional arm's length methods to a quasi formulary apportionment system. Providing a comprehensive understanding of all aspects of the formulary apportionment option. This state of the art summary of history, current practice, proposals and prospects in the ongoing debate over arm's length versus formulary apportionment methodologies will be welcomed by practitioners, policy makers and academics concerned with international taxation. All of whom will gain an understanding of the case put forward by proponents for adoption of formulary apportionment in Europe and globally and the counter arguments they face. Readers will acquire a better understanding of the implications of formulary apportionment and its central role in the current debate about the future of international taxation rules. Providing all the intellectual ammunition needed to carefully re-examine one of the ideas traditionally considered as apocryphal by the OECD and to a significant portion of the tax professional community. Readers of this book will come away not only with a renewed

understanding of the multiple facets of formulary apportionment but also of some of the fundamental pressure points in the international tax system Accordingly it is a welcome and timely addition to the literature Dr Stjepan Gad o Assistant Professor at University of Rijeka Faculty of Law British Tax Review 2021 Issue 2 p243 246

[Taxation in a Global Digital Economy](#) Ina Kerschner,Maryte Somare,2017-10-04 Time to discuss anti BEPS measures around digitalization In the course of the BEPS Report on Action 1 it

was concluded that there was no instantaneous need for specific rules to address base erosion and profit shifting BEPS made possible by the digitalization of enterprises and new digital businesses At the same time it was acknowledged that general measures may not suffice with the assessment of results to begin in 2020 While awaiting possible fundamental reforms of the tax framework it is time to discuss anti BEPS measures bearing in mind the peculiar features of the digital economy such as increased mobility no need for physical presence and dematerialization The Book focuses on five key areas of interest International Tax Policy Tax Treaty Law Transfer Pricing Indirect Taxation Issues EU Law Taxation in a Global Digital Economy analyses the issues and addresses the five key areas of interest from various viewpoints International Tax Havens Guide, 2002 *The Investment Decisions of Multinational Enterprises* A. E. Safarian, 1987 Company Taxation in the Internal Market European Commission, 2002 Analysis of problems in the field of company taxation in the Internal Market the obstacles to cross border economic activity and their possible remedies This study the major source document for the European Commission's policy statement on company taxation COM 2001 582 also considers the possibilities for a reform of company taxation at EU level which would aim at providing companies with a single consolidated tax base for their EU wide activities Financial Management for the Multinational Firm Fuad Abdul-Kader Abdullah, 1987 Includes index Towards a Neutral Formulary Apportionment System in Regional Integration Shu-Chien Chen, 2023-03-09 International tax regimes and practices are heavily criticized for failing to fairly levy corporate tax on giant multinational taxpayers in the current globalized and digitalized world This important and far seeing book demonstrates how formulary apportionment FA an approach by which a multinational corporation pays each jurisdiction's corporate tax based on the share of its worldwide income allocated to that jurisdiction can achieve the much sought goal of aligning value creation and taxation The author through an intensive analysis of the European Union's EU's Common Consolidated Corporate Tax Base CCCTB Directive Proposal's and comparison to the United States US's formulary apportionment experience shows how the perceived problems with an FA system can be overcome and lays out the necessary elements for its feasibility With detailed attention to the debates around formulary apportionment and its theoretical foundations the book provides a blueprint for rebuilding the normative framework for the EU's tax reform by clearly analysing the implications of the following and more theorising public benefits to be represented by taxation reorganising different economic theories about tax neutrality and tax justice advancing the comparative legal research methodology to analyse law reform by combining the functional approach and the problem solving approach designing the logical formulary apportionment system for digital economy ensuring the removal of the incentive for multinationals to shift reported income to low tax locations reducing the tax system's complexity and the administrative burden it imposes on firms eliminating transfer pricing complexity for intra firm transactions achieving equal weighting of the sales factor the labour factor and the asset factor in the formula application of destination based rule for attributing the sales factor and replacing the traditional permanent establishment nexus with a factor presence nexus The

presentation incorporates extensive comparison between the EU's formulary apportionment tax reform option and FA systems existing in the United States US at state level including reference to relevant US case law and legislation As a possible option to address the problem of base erosion and profit shifting BEPS formulary apportionment is gaining increasing acceptance and attention This book will prove invaluable to taxation authorities tax practitioners and scholars in its deeply informed and systematic guidance on good practices and prevention of problematic experiences in establishing and implementing an effective and market neutral FA system
