Significant Artists - to guide and influence creative ideas

'Little Girl'
(Little Girl)
Hannah
Höch
(1920)

Hannah Höch was a German artist who made collage in the 'Dada' style (meaning to make fun of the world). Her art was often surreal, meaning she tried to make her collages look as strange and random as she possibly could!

'Out
Chorus'
Romare
Bearden

Styles and Techniques

Materials	-Collage is an art form, but it is also the process of finding, collecting, arranging and sticking materials to a backing. There are a range of different materials that we can use, including paper, card, tissue paper, newspaper, fabrics, magazines and photographs. We can cut these using scissors and paste using appropriate types of glue.	
Arrangements	-Collage artists normally have a theme - this means a topic that they are going to make their collage about (e.g. an event from history or something from nature). They consider which colours, textures and materials will show the theme. They often experiment with different orders and arrangements. Some materials and colours are more powerful together or further apart. When happy with the arrangement, you can sketch this in pencil onto your backing before you stick.	
Textures	Texture is important in adding depth to a collage. Whether a material is shiny, rough, smooth, bumpy or matte, this can add meaning to the artwork. E.g. rough or torn paper can be used to show ideas like destruction or unhappiness.	

Creative Ideas and Examples

Materials:
Different lengths and colours of tissue paper work brilliantly as they are bright and inexpensive.

Study: Closely examine a real picture of what you are trying to represent. What colours, shapes and lines can you use?

Silhouette: Buildings can be created using black card or paper. These highlight the brightness and movement of the fire in comparison. Consider the shape of buildings of the time.

A child's Great Fire of London collage.

Arrange: Try different arrangements before sticking your materials down. Which colours best show the hottest parts of the fire. Which shapes show the movement of the fire?
