***Reliable Software Technology - Ada-Europe 2005***

Tullio Vardanega,Andy Wellings,2005-06-07 Started on the inspired initiative of Prof Alfred Strohmeier back in 1996 and spawned

from the annual Ada Europe conference that had previously run for 16 consecutive years the International Conference on Reliable Software Technologies celebrated this year its tenth anniversary by going to York UK where the first series of technical meetings on Ada were held in the 1970s. Besides being a beautiful and historical place in itself York also hosts the Department of Computer Science of the local university whose Real Time Group has been tremendously influential in shaping the Ada language and in the progress on real time computing worldwide. This year's conference was therefore put together under excellent auspices in a very important year for the Ada community in view of the forthcoming completion of the revision process that is upgrading the language standard to face the challenges of the new millennium. The conference took place on June 20-24 2005. It was as usual sponsored by Ada Europe the European federation of national Ada societies in cooperation with ACM SIGAda. The conference was organized by selected staff of the University of York teamed up with collaborators from various places in Europe in what turned out to be a very effective instance of distributed collaborative processing. The conference also enjoyed the generous support of 11 industrial sponsors.

**Literacies and Technologies** Robert Yagelski, 2000. *Literacies and Technologies* welcomes students into the world of critical thinking and college level writing. This reader encourages students to explore the relationship between literacy and technology and the implications of that relationship on their culture and on their own lives at a time of rapid social and technological change. This reader is intended to help foster a reflective and critical perspective on literacy and to facilitate students' development as effective and informed writers and readers.
