Puello Cruz,2024-09-19 Fish welfare is currently one of the most important concerns in aquaculture and knowledge on how to improve fish welfare should be practical and implementable for all aquaculture farms The objective of this Research Topic is to extend the current knowledge on fish welfare and to identify more comprehensive and practical indicators of the existing standard for fish welfare that are easily more comprehensive and practical indicators in order to make it easy to implement on fish farms A secondary objective is to identify which welfare

issues are most relevant It is important to mention that good fish welfare cannot simply be extrapolated from terrestrial animals It has to take into consideration that different species of fish must also be taken into consideration Whether these are species of commercial interest or not they have different behaviour and respond differently to stress and consequently require a species specific approach to improving their welfare Intensive fish production systems have important negative consequences for the animals including impaired health and erratic behaviour For many industries their main goal is to achieve higher production whilst majority of the time welfare is not take it into consideration Better conditions for intensively produced farm animals including fish should result in improved efficiency and performance and higher quality product for consumers We welcome papers demonstrating such effects This research topic is related to the welfare of farmed fish Fish welfare is related to how we treat our fish the type of feed how often we feed them the stocking density that it is used the environment where they are growing how we grow them from fertilized egg to fish ready to sell for public consumption This Research Topic should address fish welfare during the whole growth period and may also include papers on the attitudes and perceptions of stakeholders including fish farmers and public about fish welfare **Farm-made Aquafeeds** Food and Agriculture Organization of the United Nations,1995-01-01 This book is the proceedings of a meeting held in Bangkok in December 1992 on the use of farm made feeds in Asia It contains eleven country reviews of the topic for Bangladesh Cambodia China India Indonesia Malaysia Nepal the Philippines Singapore Thailand and Vietnam Nine technical papers are also included Three are on farm feed preparation and feeding strategies for carps and tilapias for catfish and snakehead and for marine shrimp and prawns Five other working papers are on economics the selection of equipment feed ingredients formulation and on farm management and supplementary feeding in semi intensive aquaculture all directed at farm made rather than commercial feeds The ninth working paper is a regional overview of aquafeeds in Asia An analysis of the material in the eleven country papers is also presented **Culture of Fish in Rice Fields** Matthias Halwart,Modadugu V.
