## **Time And The Metaphysics Of Relativity Philosophical Studies Series:**

**Time and the Metaphysics of Relativity** W.L. Craig, 2013-11-11 he present volume is part of a larger project which is the attempt to draft a coherent doctrine of divine eternity and God's relationship to time In my God, Time and Eternity I argued that whether one construes divine eternity in terms of timelessness or of omnitemporality will depend crucially upon one's views about the objectivity of tensed facts and temporal becoming If one adopts a tensed or in McTaggart's terminology an A Theory of time then a coherent doctrine of divine eternity requires that one construe God at least since the moment of creation to exist temporally which implies that divine timelessness can be successfully maintained only if a tenseless or B Theory of time is correct Accordingly in my companion volumes *The Tensed Theory of Time: A Critical Examination* and *The Tenseless Theory of Time: A Critical Examination* I set for myself the task of adjudicating the A vs B Theory of time In the former volume I examine arguments for and against the A Theory of time and in the latter I turn to an examination of arguments for and against the B Theory This inquiry took me into a study of relativity theory its presuppositions and implications The paucity of integrative literature dealing with the concept of God and relativity theory is striking

**Time and the Metaphysics of Relativity** William Lane Craig, 2014-03-14      **Dictionary of Christianity and Science** Zondervan, 2017-04-25 The definitive reference work on science and Christian belief How does Christian theology relate to scientific inquiry What are the competing philosophies of science and do they work with a Christian faith based on the Bible No reference work has covered this terrain sufficiently until now Featuring entries from over 140 international contributors the *Dictionary of Christianity and Science* is a deeply researched peer reviewed fair minded work that illuminates the intersection of science and Christian belief In one volume you get reliable summaries and critical analyses of over 450 relevant concepts theories terms movements individuals and debates You will find answers to your toughest questions about faith and science from the existence of Adam and Eve to the age of the earth evolution and string theory **FEATURES INCLUDE** Over 450 entries that will help you think through some of today's most challenging scientific topics including climate change evolution bioethics and much more Essays from over 140 leading international scholars including Francis Beckwith Michael Behe Darrell Bock William Lane Craig Hugh Ross Craig Keener Davis Young John Walton and many more Multiple view essays on controversial topics allow you to understand and compare differing Christian viewpoints Learn about flesh and blood figures who have shaped the interaction of science and religion Augustine Aquinas Bacon Darwin and Stephen Hawking are just the beginning Fully cross referenced entries include references and recommendations for further reading Advance Praise Every Christian studying science will want a copy within arm's reach Scot McKnight Northern Seminary This is an invaluable resource that belongs in every Christian's library I will be keeping my copy close by when I'm writing Lee Strobel Elizabeth and John Gibson chair of apologetics Houston Baptist University Sparkles with passion controversy and diverse perspectives Karl Giberson professor of science and religion Stonehill College An impressive

DeWeese,2017-03-02 Is God temporal in time or atemporal outside of time Garrett DeWeese begins with contemporary metaphysics and physics developing a causal account of dynamic time Drawing on biblical material as well as discussions of divine temporality in medieval and contemporary philosophical theology DeWeese concludes that God is temporal but not in physical time as we measure it Interacting with issues in the history of philosophy contemporary philosophy of science and philosophy of religion this book offers students a thorough introduction to the key issues and key figures in historical and contemporary work on the philosophy of time and time in theology Heart of the Living God Michael G.

Maness,2004-06-23 Maness asks us to tie up our sneakers for we are going to have some fun as we hike into the Grand Canyon of Love Love is the treasure of life It is Love all the way Nothing else really matters outside of Love Best of all our Love will only get better in heaven The treasured ability to have loving relationships is Gods gift to us in our Imago Deithe image of God we all share Likewise what we know of Love this side of heaven is but a dusty image of what God experiences I want to get personally involved says Maness Can we have a free will relationship with anyone even God if all of what we do and think is settled I dont think so Love is greater than that and I shall prove that and that is indeed a Grand Canyon Manes brings some of the brain splitting complexities of this to light with good humor introduces dynamic foreknowledge and challenges Classical Theisms avoidance of Love And he exposes some foul play in the process Thats the first half of the book For those wanting to strike out on their own wanting to see more of the depth and diversity of the Grand Canyon the second half contains reviews of about 60 major authors a 4 000 Abysmal Bibliography and a huge index to just about everything in the book Maness has thrown a gauntlet before the Classical Theists So tie up your sneakers and take a hike with Michael G Maness as he walks with you into the Grand Canyon see more at [www.PreciousHeart.net](http://www.PreciousHeart.net) **Space God JD**

Lyonhart,2023-10-19 Henry More had an odd idea Thinking about space he realized it was invisible for we see things in space but not space itself It s also immaterial for matter exists in space but space is not itself material try to grab it and it slips through your fingers Space was also infinite and transcendent yet nonetheless omnipresent for we cannot go anywhere except in and through space But this was exactly how More saw God God is invisible immaterial infinite and transcendent yet also omnipresent above beyond and within us If God was somehow linked to space he could be truly present while remaining

immaterial upholding the creator creature distinction He d be near to us but would not be identical with us just as space is distinct from the objects occupying it while remaining intimately close to those objects What if space was in some sense divine Odder still Newton soon erected his new physics upon More s idea Indeed there s real evidence that the modern scientific world was unwittingly grounded upon this theistic metaphysic Of course modern physics shed these underpinnings in the nineteenth century and was itself relativized by Einstein in the twentieth Yet this book seeks to reappraise More s odd idea Is divine space theologically orthodox Can it provide a new argument for the existence of God And does it have any philosophical merit for us post Einstein a Space God for a Space Age

**The Tenseless Theory of Time** W.L. Craig, 2013-03-09 he present book and its companion volume *The Tensed Theory of Time a T Critical Examination* are an attempt to adjudicate what one recent discussant has called the most fundamental question in the philosophy of time namely whether a static or a dynamic conception of the world is correct I had originally intended to treat this question in the space of a single volume but the study swelled into two I found that an adequate appraisal of these two competing theories of time requires a wide ranging discussion of issues in metaphysics philosophy of language phenomenology philosophy of science philosophy of space and time and even philosophy of religion and that this simply could not be done in one volume If these volumes succeed in making a contribution to the debate it will be precisely because of the synoptic nature of the discussion therein Too often the question of the nature of time has been prematurely answered by some philosopher or physicist simply because he is largely ignorant of relevant discussions outside his chosen field of expertise In these two complementary but independent volumes I have attempted to appraise what I take to be the most important arguments drawn from a variety of fields for and against each theory of time

**Divine Foreknowledge and Human Freedom** William Lane Craig, 1990-12-01 The ancient problem of fatalism more particularly theological fatalism has resurfaced with surprising vigour in the second half of the twentieth century Two questions predominate in the debate 1 Is divine foreknowledge

compatible with human freedom and 2 How can God foreknow future free acts Having surveyed the historical background of this debate in *The Problem of Divine Foreknowledge and Future Contingents from Aristotle to Suarez* Brill 1988 William Lane Craig now attempts to address these issues critically His wide ranging discussion brings together a thought provoking array of related topics such as logical fatalism multivalent logic backward causation precognition time travel counterfactual logic temporal necessity Newcomb s Problem middle knowledge and relativity theory The present work serves both as a useful survey of the extensive literature on theological fatalism and related fields and as a stimulating assessment of the possibility of divine foreknowledge of future free acts      Philosophical Studies David George Ritchie,1905 *Memoir Cogitatio metaphysica* The relation of logic to psychology *Philosophical review* vol V vol VI The relation of metaphysics to epistemology *Philosophical review* vol III The one and the many *Mind* n s vol VII *Confessio fidei* Moral philosophy On the method and scope of ethics Index      **American Book Publishing Record** ,2003      **The British National Bibliography** Arthur James Wells,2001      *A History of the Scottish People from the Earliest Times* Thomas Thomson,1894      **Recording for the Blind & Dyslexic, ...
