Telling Tales Over Time Joel Weiss, Robert S. Brown, 2013-06-13 How do calendars and clocks influence considerations of school effectiveness From the creation of compulsory education to the

future of virtual schooling Weiss and Brown trace two centuries of school practices policies and research linking the concept of time with opportunity to learn School calendars and clocks are shaped by both the physical and social worlds and the clock of schooling is shown to be one of the great clocks of society that helps to frame school effectiveness School time does not operate in a vacuum but within curriculum teaching and learning situations The phrase chrono curriculum was devised by the authors as a metaphor for exploring issues of school effectiveness within the time dimension Using American and Canadian sources stories are created to illustrate four themes about time and school effectiveness The first three stories utilize access attendance and testing as criteria associated with these eras of schooling How will the story read in the fourth era the digital age which forces us to a reconsideration of time and its influence on education Quoting David Berliner in his Foreword this is an opportune time for these authors to bring us insights into the reasons we in North America created our public school systems and how the chrono curriculum influences those systems The authors presentation of our educational past provides educators a chance to think anew about how we might do schooling in our own times **Essentials of**

Edward Dutton, Michael A. Woodley of Menie, 2018-12-20 We are becoming less intelligent This is the shocking yet fascinating message of At Our Wits End The authors take us on a journey through the growing body of evidence that we are significantly less intelligent now than we were a hundred years ago The research proving this is at once profoundly thought provoking highly controversial and it is currently only read by academics But the authors are passionate that it cannot remain ensconced in the ivory tower any longer With At Our Wits End they present the first ever popular scientific book on this crucially important issue They prove that intelligence which is strongly genetic was increasing up until the breakthrough of the Industrial Revolution because we were subject to the rigors of Darwinian Selection meaning that lots of surviving

children was the preserve of the cleverest But since then they show intelligence has gone into rapid decline because large families are increasingly the preserve of the least intelligent The book explores how this change has occurred and crucially what its consequences will be for the future Can we find a way of reversing the decline of our IQ Or will we witness the collapse of civilization and the rise of a new Dark Age **Psychological testing** Bev Lloyd & Mel Reed,2018-11-17
