

# Volume of Square Based Pyramid

The volume of a square based pyramid can be found by using the formula

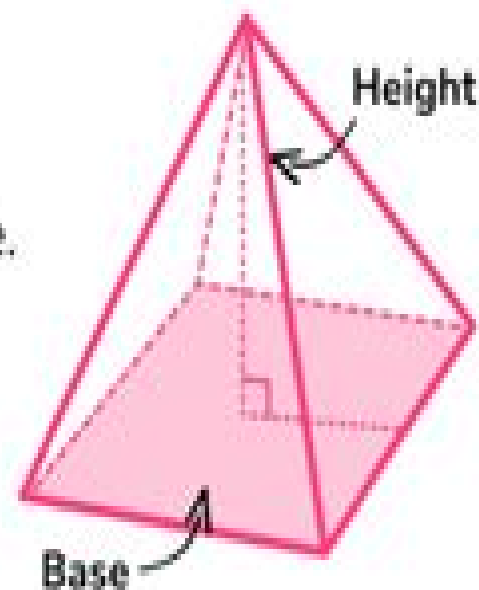

$$\text{Volume} = \frac{1}{3} \times \text{area of base} \times \text{height} \quad \text{or} \quad V = \frac{1}{3}bh$$

The height should always be perpendicular (  $90^\circ$  ) to the base.

**Example** Find the volume of a square based pyramid with height 6cm and base side length 4cm:

$$\text{Volume} = \frac{1}{3} \times 4 \times 4 \times 6 = \frac{1}{3} \times 96 = 32\text{cm}^3$$

The base side length is 4cm, so the area of the base is  $4 \times 4$ , because the base is a square

Natural Geometry A. Mault, 1877

**Ged Basics in Mathematics** Henry Varela, 2004-06-27 The aim of this book is to present the subject matter of arithmetic geometry and algebra with the utmost clarity and simplicity It is based on the mathematical subjects required in four years of high school study and will prepare the student with the skills necessary to pass the GED Mathematics Test The text consists of ten chapters with a review of geometry and algebra because of the many concepts introduced in these particular subjects The last chapter is devoted to a practice test consisting of questions and problems similar to those presented on the real GED test Answers to the practice test are provided with detailed explanations of the suggested method of solving each problem Each chapter opens with a brief introduction before developing the ideas and facts of the subject matter In order to give the student an insight into the principle involved many examples are given to provide an understanding of the topic rather than to just offer a rule The examples enable students to proceed at their own pace in accordance with their individual needs Problems are then introduced for the student to solve so as to stimulate clear and

organized thinking Answers to the problems are included at the end of each chapter thus helping to reinforce the students knowledge step by step Due to the fact that the language is direct and the method of presentation is concerned with essentials only the skills can be learned by anyone willing to spend some time in self study Also even though simplified this book of mathematics is complete and authoritative It is recommended for use in home schooling as a supplementary text or as a gateway to advanced math and science     *Problems in the Calculus* David Deitch Leib,1915     Solid Geometry Joseph Antonius Nyberg,1929     **Cassell's New Popular Educator** ,1920     . **Seventh school year** Raleigh Schorling,John Roscoe Clark,1924     Modern Mathematics Raleigh Schorling,John Roscoe Clark,1924     **Third-year Mathematics for Secondary Schools** Ernst Rudolph Breslich,1917     *Plane and Solid Geometry* Marquis Joseph Newell,George Andrew Harper,1918 Former ETHS teachers Gene and Ellen Stern found that her father s geometry book was edited by a much earlier ETHS faculty member     The Elements of Solid Geometry Arthur Latham Baker,1894     **Exercises in Practical Physics for Schools of Science** Sir Richard Gregory,Arthur Thomas Simmons,1899     Plane and Solid Geometry Isaac Newton Failor,1906     **The New Geometry Complete** Alexander Symon,1928     Explanatory mensuration for the use of schools Alfred Hiley,1892     Explanatory Mensuration ...
