scenario where intellectual property is utilized wouldn't it be possible to develop popular computer programs that respond to a person's eye movement? The way this would work is for the computer's camera to follow eye movement and take commands when a specific time interval has elapsed. This is when the eye is aimed at a certain command such as 'save document'. This would save immense time and energy to all consumers. The purpose of this literature is to raise the bar for all interested parties. It's impossible to raise the sea level with a few drops of water; however, a tumultuous tropical rainstorm may raise the sea level by myriads. Tropical storms aren't positive encounters; however, the concept of raising the level for all humanity is relevant and positive. It's important to learn from the bad, utilize the bad for good purposes, and empower the bad for the good via transformation. The question arises: what's the transformation process? By inspecting the negative attributes of the bad, finding solutions that transform them into good. That is the definition of a true leader.
