Exemplary Science In Informal Education Settings: Standards-Based Success Stories Robert E. Yager,2007-10-04 Just as science education doesn't stop at the schoolhouse door neither should effective application of the National Science Education Standards. Exemplary Science in Informal Education Settings shows real world examples of how science education reform has taken hold in museums, science centers, zoos and aquariums as well as on television, radio and the internet. This essay collection, the fifth volume in the Exemplary Science Monograph Series, features 17 informal education programs that were judged to be most successful at increasing participants' learning. The programs demonstrate how the Standards can be used to inform and improve science education in a wide range of settings and with learners ranging from pre schoolers to older adults

School-age Child Care Ruth Kramer Baden,1982 Designed to be used by parents, school principals, program directors, superintendents or others interested in child care programs this action manual provides ideas, models and guidelines for the design, development, implementation and operation of a program for the school age child. Part 1 offers profiles of existing models of child care programs around the United States which reflect creative community solutions to the dilemma of school age child care. Part 2 outlines the step by step process of getting started from individuals' initial perceptions that there is a need in the community for school age child care to the formation of a planning group and identification of the work it must accomplish. Part 3 specifies legal issues that should be investigated before a program can be put into operation and discusses the mechanisms and strategies which can be used to successfully obtain cooperation and community approval for the program. Detailed discussions of the policies and procedures relating to the administration, staff development, finances and day to day operation of the program is presented in part 4. Finally part 5 discusses ways for planning, implementation and evaluation of a school age child care curriculum. MP
