## **Sumner Gearing Class Destroyers Their Design Weapons And Equipment:**

*Sumner-Gearing-class Destroyers* Robert F. Sumrall, 1995 The US Navy's Sumner Gearing class destroyers served as a standard for post WWII destroyer design and development. In this outstandingly illustrated work, bandw throughout with a 16 page color center spread, Sumrall traces the origins and evolution of these destroyers over nearly forty years and through three wars showing the advances made in ordnance, fire control and steam engineering. **US Destroyers 1942-45** Dave McComb, 2011-12-20 Few if any 20th century warships were more justly acclaimed than the destroyers of the US Navy's Fletcher class. Admired as they were for their advanced and rakish design, it was their record as workhorses of the Pacific War that placed them among the most battle tested and successful fighting ships of all time. This title describes the Fletchers and their Allen M. Sumner and Gearing class derivatives, their machinery, armament and construction, with a listing of all 343 ships by hull number and builder. It features an operational history of the 287 ships commissioned during World War II, which traces the evolution of night surface action tactics in the Solomon Islands and the parallel development of the Combat Information Center, the drive across the Pacific and liberation of the Philippines, with tables showing the rapid introduction of new squadrons and the radar pickets climactic stand against kamikaze aircraft at Okinawa. With summaries of losses and decorations and specially commissioned artwork, this is a definitive book on the wartime US destroyer classes.

**US Destroyers 1934-45** Dave McComb, 2011-12-20 Since the beginning of the 20th century, destroyers have been all purpose ships, indispensable from delivering the mail at sea to screening other vessels and where larger ships were not present, forming the front line in battle. This illustrated guide details the 169 ships of ten classes introduced in the 1930s, early 1,500 tonners and 1,850 ton destroyers, leaders designed to conform to the 1930 London Naval Treaty plus the successor 1,570 ton Sims class and 1,620 and 1,630 ton Benson and Gleaves classes. In wartime, most 1,500 tonners and leaders initially saw front line duty in the Pacific but were relegated to secondary assignments as newer vessels arrived while the later 1,620 and 1,630 tonners became the standard destroyers of the Atlantic War. This volume reveals the fascinating design story behind these pioneering classes, from the constraints of peacetime treaties to advances in propulsion engineering and wartime modifications. With an operational overview of their service and tables listing all ships by class, builder and initial squadron, this is the definitive guide to the pre-war US destroyer classes.

*American Naval History in 50 Ships* James M. Caiella, 2025-08-01 The course of American naval history has not been set only by the relatively few famous ships whose stories have been told and retold. This volume spotlights 50 less recognized vessels, each significant in its own way, from the Continental Navy to the first supercarriers, while touching on many others with which their stories are interwoven. Attention is given not only to the design and conceptual changes the vessels embodied but also to the crews whose toil and heroism gave them life and sometimes notoriety. One captain tried to sell his warship in the midst of the Civil War. Each ship is detailed chronologically in chapters that often dispel timeworn misconceptions. Some were trailblazers, others

were misdirected in their inspiration design or execution indeed two could not float and one was dampened only by rain Yet each helped shape America's seafaring history *Air University Library Index to Military Periodicals*, 1996 **U.S. Naval Institute Proceedings** United States Naval Institute, 1995 **Nautical Research Journal**, 1996 **Naval Engineers Journal**, 1996 **Ships Monthly**, 1995 **Warship**, 1996 **Indian Defence Review**, 1997 Naval War College Review, 1996 **Forgotten Fleet** Daniel Madsen, 1999 A pictorial history of the U.S. Navy's mothball fleet this handsome book takes a rare look at the so called fleet behind the fleet from the end of World War II to the present Through photographs of the ships and shipyards where they were laid up and brief ship histories it tells the story of how these ships were paid off and preserved how some were reactivated and how most left the reserve fleet to be broken up Additional photos of the ships in action remind readers that forgotten though they were while in mothballs many made their marks on history Year after year the warships lay quiet and lifeless like boarded up old houses once full of activity that had outlived their usefulness The row upon row of mostly now anonymous vessels hatches sealed shut offer a bleak contrast to the drama of their wartime operations You can almost hear the wind whistling through the masts and superstructures stripped of radars Below decks there is only the sound of the dehumidifiers removing moisture from the air retarding the buildup of rust and deterioration Berthing areas repair shops and radio rooms have been frozen in time looking exactly as they did when sealed decades before Among them are such well known ships as the Enterprise and the Midway as well as little known ones like the Fall River and some that were laid up almost as soon as they were completed like the Oregon City Here too are the frigates and nuclear submarines of a later age These are the ships of the forgotten fleet built for war but resting at peace in coastal parking lots on both sides of the country their story told for the first time *Books In Print 2004-2005* Ed Bowker Staff, Staff Bowker, Ed, 2004 American Book Publishing Record, 1995 **The British National Bibliography** Arthur James Wells, 1995 **The Mariner's Mirror Bibliography for ...**, 1995 *Conway's Directory of Modern Naval Power*, 1986 Hugh W. Cowin, 1985 *The Ships and Aircraft of the U.S. Fleet* Norman Polmar, 1981 Destroyers Max Walmer, 1989 Describes the history types weapons and present uses of destroyers both in the United States and the Soviet Union
