Spirituality and Global Ethics Mahmoud Masaeli, Rico Sneller, 2017-05-11 This volume addresses three fundamental questions about the interplay between the ethics of globality and spirituality. What are the practical implications of spirituality for the condition of life in a turbulent era of violent religious and non-religious extremism? In what way can spirituality, the view of love, compassion, tolerance and mutual recognition, encounter mistrust, enmity, separateness and violence? How and in what way can spirituality contribute to the newly emerging global ethics? Religious scholars distinguish between the esoteric and exoteric sides of belief systems. Esotericism centres on the inner awareness and conceals a certain spirituality that is only transmittable to those who could successfully pass through a process of initiatic preparation and transpersonal practices to understand the mystical dimensions of existence. In contrast, exotericism takes the outer dimension of every day consciousness into account and favours the possibility of the popular understanding of the essence of existence. In this perspective, truth could be grasped by the public without the need of any transpersonal initiative and transformation of consciousness. Esotericism extends beyond religion and has become the spiritual philosophy of life without the need of being essentially religious. It has become common, notably in the West, to identify oneself as spiritualist without having religious affiliations. The condition of globality has provided an unprecedented opportunity for spiritual perspectives to grow. Ideas, perspectives, beliefs and philosophies of life are growing outside local national containers to express themselves in different global settings while the forces of globalisation are influencing local identities and cultures. While evolving global transformations strengthen people's capability to leave institutionally ordered belief systems, it simultaneously enables them to rearrange themselves around alternative perspectives. These fundamental transformations cultivate a fabulous landscape for the growth of spirituality.

Islam in Historical Perspective Alexander Knysh, 2024-09-30 Islam in Historical Perspective is a general introduction to Islam and the history of Muslim societies. Richly illustrated by quotations and images from Muslim scripture, historical chronicles, artistic works and theological and juridical treatises, it invites the reader to examine this evidence and to form a comprehensive understanding of Islam's evolution from its inception in Arabia to the present day. Combining chronological and thematic principles, this book examines Muslims' political and intellectual struggles over the meaning and practical implications of their faith. Treating Islam as a language that various factions and generations of Muslims have used to express their grievances, aspirations and personal experiences and preferences, the book shows the religion's remarkable potency as a social, political and cultural force and source of identity. It also describes and analyses Muslim devotional practices, emotional responses to the revelation, artistic and intellectual creativity and patterns of everyday existence.
