## **The Mitten Read Online:**

*CyberLit* Marilyn Dover Newman, 2004 Elementary school media specialists and teachers routinely use children's picture books in their lessons. These books add depth and vitality to the curriculum because they are written and illustrated by some of the world's most gifted writers and artists. Yet educators are finding it increasingly harder to insert this pleasant and important activity into the busy school day due to increased pressures to improve test scores, to implement a standards-driven curriculum, and to stay abreast of new technologies to deliver instruction. This book helps educators continue to incorporate literature into the school day in spite of these obstacles. *CyberLit* is a book for those who work with or teach others who work with children in the primary grades. It is for those who use trade books to supplement and enhance health, science, creative writing, history, geography, reading, math, language arts, character education, multicultural studies, holidays, citizenship, and the fine arts. It is for those who love children's literature and book illustration. With this book, you no longer need to get lost in cyberspace. The information has already been searched, collected, assessed, and compiled. Easily accessible and at your fingertips, this directory can help you to get biographical information about authors and illustrators and to learn how they get ideas for stories, how illustrations are created, how to extend the books into the curriculum, and where to find time-saving lesson plans and book-related activities for classroom projects and units. These outstanding websites of children's authors, illustrators, and storybook characters were selected based on their educational value and for the fact that they contain a minimum of commercialization. They are exemplary examples of authors, publishers, and scholars who understand and acknowledge the roles of teachers and librarians. Like little gems in cyberspace, they go beyond the ordinary content for busy educators.

*The Annotated Malay Archipelago* by Alfred Russel Wallace, 2014-09-29 Wallace's *Malay Archipelago* is a classic account of the travels of a Victorian naturalist through island Southeast Asia. It has been loved by readers ever since its publication in 1869. Despite numerous modern reprints with appreciative introductions, this is the first and long overdue annotated edition in English. This edition explains updates and corrects the original text with an historical introduction and hundreds of explanatory notes. Wallace left hundreds of people, places, publications, and species unidentified.

He referred to most species only with the scientific name current at the time Whenever available the common names for species have been provided and scientific names updated The content of the book has never been thoroughly analysed and compared against other contemporary sources It turns out that the book contains many errors This includes not just incorrect dates and place names but some of the most remarkable anecdotes for example the dramatic claim that tigers kill on an average a Chinaman every day in Singapore or that a Dutch Governor General committed suicide by leaping from a waterfall on Celebes By correcting the text of the Malay Archipelago against Wallace s letters and notebooks and other contemporary sources and by enriching it with modern identifications this edition reveals Wallace s work as never before
