

Timeslips Hidden Treasure #11 – Database Security

Whether you are using Timeslips on one computer or many, your business depends on the reliability of the valuable data contained in your Timeslips database. Regular backups are important but aren't enough to ensure dependable access to your records. Recognizing that secure data has never been more important than it is today, Timeslips provides security features that, by establishing password access for each timekeeper and database, will protect your data from unauthorized access.

We recommend that a master Supervisor password be set up so that only your Timeslips administrator can access your Timeslips security system. Keep this password in a safe place but know that, because **Integrated Visions** is Data Repair Certified, one of the services we provide our clients is that we can unlock your system if the password is lost or forgotten.

There are three elements to the Timeslips security features, all found in the **Setup/Security** menu option:

- Global** – Allows you to establish the Supervisor password, activate the login prompt and set usage options.

- Profiles** – Allows you to establish templates or profiles for providing specific access rights to groups of timekeepers.

- Timekeeper rights** – Allows you to assign a password and profile to the timekeeper and override profile rights when needed.

Instructions for setting up each security element follows. Be sure to perform all three (3) steps. If you require assistance, contact the **Integrated Visions** Help Desk at (858) 724-0044.

STEP 1 - Setting Global Security Options to enable security:

1.1 Select **Setup/Security/Global** from the Timeslips menu bar.

1.2 Create and enter whatever **Security Supervisor's Password** you want to assign. After step 1.7, below, this password will be required to access all security options, so be sure to keep it in a safe place or give it to **Integrated Visions** for safekeeping.

1.3 Select the option **Require login and activate security** by clicking a checkmark in its box. Without selecting this option, login names will appear but no security will be enforced.

1.4 Select the option named **Password required to log in**. This will ensure proper security is in place.

1.5 Change **Default Profile for a new Timekeeper** to the desired profile. You will have to come back to this option once the profiles are established in the next step.
