**Tables of Redemption Values for United States Savings Bonds for All Months from**,1980 Fiscal Policy During the Demise of Central Planning Mr. Andrew Feltenstein,1990-10-01 This paper constructs an intertemporal general equilibrium model designed to examine an economy in transition from central planning to being market oriented A numerical algorithm is developed to obtain a solution for the model Simulations using stylized country specific data examine the effects of price controls during the transition period as well as of imposing taxes on returns to investment and on interest earned on private savings The paper concludes that under certain circumstances the taxation of investment as well as of private savings may have positive effects upon consumer welfare if price distortions are sufficiently severe

Savings, Investment, and Growth in Eastern Europe Mr. Eduardo Borensztein,Mr. Peter Montiel,1991-06-01 Even modest investment rates may achieve satisfactory rates of growth in the reforming economies of Eastern Europe because their relative capital scarcity implies high rates of productivity for capital The most serious obstacle to private investment is uncertainty about the reform process which can potentially rule out all but the most profitable projects This problem sharply increases the payoff from accelerating the structural reform process Regarding savings critical aspects are the changes in methods of financing resulting from economic reform and the availability of foreign savings both in the form of loans and foreign direct investment
