**Emergent Syntax for Conversation** Yael Maschler, Simona Pekarek Doehler, Jan Lindström, Leelo Keevallik, 2020-02-15

This volume explores how emergent patterns of complex syntax that is syntactic structures beyond a simple clause relate to the local contingencies of action formation in social interaction. It examines both the on line emergence of clause combining patterns as they are patched together on the fly as well as their routinization and sedimentation into new grammatical patterns across a range of languages English, Estonian, Finnish, French, German, Hebrew, Italian, Mandarin and Swedish. The chapters investigate how the real time organization of complex syntax relates to the unfolding of turns and actions focusing on i how complex syntactic patterns or routinized fragments of canonical patterns serve as resources for projection ii how complex syntactic patterns emerge incrementally moment by moment out of the real time trajectories of action iii how formal variants of such patterns relate to social action and iv how all of these play out within the multimodal ecologies of action formation. The empirical findings presented in this volume lend support to a conception of syntax as fundamentally temporal emergent dialogic sensitive to local interactional contingencies and interwoven with other semiotic resources.

Constructions

Peter Auer, Stefan Pfänder, 2011-08-29 This volume embarks on an exploration of the processual and dynamic character of grammatical constructions in emergence both from an emergent and an emerging perspective. Emerging constructions develop out of their discourse contexts Talking of emerging constructions is compatible with a view of grammar as a stable system of rules and structures which may emerge i e come into existence out of a pool of previously unordered elements. Emergent constructions on the contrary are due to the on line production of grammar in time. The term emergent emphasises the fact that a grammatical structure is always temporary and ephemeral. In both senses grammar is modelled as a highly adaptive resource for interaction. On the basis of empirical studies on spoken English, German, Hebrew, Swedish and French the volume addresses the following questions: How can what initially appears to be construction x end up being construction y in on line syntax? What are the local interactional needs which such processes respond to in the process of their emergence? Does the on line re-modelling of a construction concern its syntactic or semantic side or both? And finally: Should emergent grammatical structures as they unfold in real time be seen as stages in the emerging of grammar?

grammatical trajectories in real time in response to local contingencies The book is designed to be both informative for the specialized scholar and accessible to the graduate student familiar with conversation analysis and or interactional linguistics

**Conversation Analysis and Sociological Theory** Melisa Stevanovic,David Inglis ,Anssi Peräkylä,Emmi Koskinen,2024-08-22 The relations between Conversation Analysis CA sociology and social theory are complex often ambiguous and have sometimes been rather fraught While there might be some relatively high level of agreement amongst their practitioners on what CA is what it does and what it is meant to achieve that is not so much the case for the more open and broad terrains of sociology and social theory Moreover each of the domains in question has changed in orientation composition and academic location since CA first came into existence in the late 1960s While initially a child of sociology as CA has matured and extended its substantive and methodological reach it has become a large intellectual domain in its own right with inputs from and relevance for a host of other disciplines notably linguistics anthropology and psychology It is now no longer at all clear how CA relates to sociology and social theory what each side currently does or what it could bring to the other in the future
