Jacket *Time Series Models for Business and Economic Forecasting* Philip Hans Franses,1998-10-15 The econometric analysis of economic and business time series is a major field of research and application The last few decades have witnessed an increasing interest in both theoretical and empirical developments in constructing time series models and in their important application in forecasting In Time Series Models for Business and Economic Forecasting Philip Franses examines recent developments in time series analysis The early parts of the book focus on the typical features of time series data in business and economics Part III is concerned with the discussion of some important concepts in time series analysis the discussion focuses on the techniques which can be readily applied in practice Parts IV VIII suggest different modeling methods and model structures Part IX extends the concepts in chapter three to multivariate time series Part X examines common aspects across time series

The Econometric Analysis of Time Series Andrew C. Harvey,1981 Time Series Analysis and Adjustment Haim Y Bleikh,Professor Warren L Young,2014-07-01 In Time Series Analysis and Adjustment the authors explain how the last four decades have brought dramatic changes in the way researchers analyze economic and financial data on behalf of economic and financial institutions and to provide statistics An understanding of time series and the application and knowledge of related time series adjustment procedures is essential in areas such as risk management business cycle analysis and forecasting The case studies in this book demonstrate that time series adjustment methods can be efficaciously applied and utilized for both analysis and forecasting but they must be used in the context of reasoned statistical and economic judgment this is the first known published study to really deal with this issue of context
