**Programming for Modern High Performance Computing Systems** Paweł Czarnul, 2018-03-05 In view of the growing presence and popularity of multicore and manycore processors accelerators and coprocessors as well as clusters using such computing devices the development of efficient parallel applications has become a key challenge to be able to exploit the performance of such systems. This book covers the scope of parallel programming for modern high performance computing systems. It first discusses selected and popular state of the art computing devices and systems available today. These include multicore CPUs manycore co-processors such as Intel Xeon Phi accelerators such as GPUs and clusters as well as programming models supported on these platforms. It next introduces parallelization through important programming paradigms such as master slave geometric Single Program Multiple Data SPMD and divide and conquer. The practical and useful elements of the most popular and important APIs for programming parallel HPC systems are discussed including MPI OpenMP Pthreads CUDA OpenCL and OpenACC. It also demonstrates through selected code listings how selected APIs can be used to implement important programming paradigms. Furthermore it shows how the codes can be compiled and executed in a Linux environment. The book also presents hybrid codes that integrate selected APIs for potentially multi level parallelization and utilization of heterogeneous resources and it shows how to use modern elements of these APIs. Selected optimization techniques are also included such as overlapping communication and computations implemented using various APIs. Features Discusses the popular and currently available computing devices and cluster systems. Includes typical paradigms used in parallel programs. Explores popular APIs for programming parallel applications. Provides code templates that can be used for implementation of paradigms. Provides hybrid code examples allowing multi level parallelization. Covers the optimization of parallel programs
