M Woodhall

The Small Big Small Changes That Spark Big Influence:

The small BIG Steve J. Martin, Noah Goldstein, Robert Cialdini, 2016-04-12 Three experts in persuasion science reveal the small changes you can make for a big improvement in your ability to influence others. At some point today you will have to influence or persuade someone. It may be your boss, a co-worker, a customer, client, spouse, your kids, or even your friends. Most likely the key to succeeding will be a small change in your approach, one that delivers big. In **The small BIG** Steve Martin, Noah Goldstein, and Robert Cialdini reveal how influence, persuasion, and behavioral change happen in today's information overloaded world. Drawing on cutting edge research in neuroscience, cognitive psychology, social psychology, and behavioral economics, the authors explain why it isn't information *per se* that leads people to make decisions, but the context in which that information is presented. It only takes a small shift in your approach to tap into someone's deeply felt human motivations. The authors present more than fifty small changes you can start using today to dramatically improve your powers of persuasion.

Behavioral Science & Policy: Volume 1, Issue 1 Craig Fox, Sim B. Sitkin, 2015-06-23 The success of nearly all public and private sector policies hinges on the behavior of individuals, groups, and organizations. Today, such behaviors are better understood than ever thanks to a growing body of practical behavioral science research. However, policymakers often are unaware of behavioral science findings that may help them craft and execute more effective and efficient policies. The pages of this new journal will become a meeting ground, a place where scientists and non-scientists can encounter clearly described behavioral research that can be put into action. By design, the scope of BSP is broad, with topics spanning health care, financial decisionmaking, energy, and the environment, education and culture, justice and ethics, and work place practices. Contributions will be made by researchers with expertise in psychology, sociology, law, behavioral economics, organization science, decision science, and marketing. The first issue includes articles that challenge assumptions that many people have about behavioral policy interventions. This includes the assumption that intuitions are a valid indication of policy effectiveness, the assumption that large effects require large interventions, the assumption that pre-selecting defaults is more coercive than forcing citizens to make a choice, and the assumption that the effectiveness of behavioral nudges requires that people not be informed about them. The journal is a key offering of the Behavioral Science Policy Association in partnership with the Brookings Institution. The mission of BSPA is to foster dialog between social scientists, policymakers, and other practitioners in order to promote the application of rigorous empirical behavioral science in ways that serve the public interest. BSPA does not advance a particular agenda or political perspective. The first issue's contents follow.

Management and Leadership for Nurse Administrators Linda Roussel, James Leonard Harris, Patricia L. Thomas, 2016 Management and Leadership for Nurse Administrators, Seventh Edition provides professional administrators and nursing students with a comprehensive overview of management concepts and theories.
