**The Social Organization of South Asian Immigrant Women's Mothering Work** Ferzana Chaze, 2018-10-01 This book examines the social organization of recent immigrant South Asian women's mothering work It explicates the processes that contribute to those belonging to this social group making changes to their mothering work after immigrating to Canada despite having reservations about doing so The book draws its findings from interviews with 20 South Asian immigrant mothers who were raising school aged children in Canada and had been in the country for less than five years Government policies websites and newspaper reports also form important data sources for this study Using institutional ethnography the book shows the disjuncture between the mothering work of the South Asian immigrant woman and institutionally backed neoliberal discourses in Canada around mothering schooling and immigrant employment It highlights the manner in which the settlement experiences for South Asian immigrant women can become stressful and complicated by the changes that these women are required to make in line with these institutional discourses The study explicates how the work of immigrant mother in the settlement process changes over time as she participates in social relations that require her to raise her children as autonomous responsible citizens who can participate in a neoliberal economy characterised by precarious work The research that informs this book has implications for the social work profession which is connected in many ways to the settlement experiences of immigrant women

**Social Organization of Work, The. 4th Ed. ( 9780495003717 ).** Randy Hodson, 2008 [The Return of Work in Critical Theory](#) Christophe Dejours, Jean-Philippe Deranty, Emmanuel Renault, Nicholas H. Smith, 2018-06-19 From John Maynard Keynes's prediction of a fifteen hour workweek to present day speculation about automation we have not stopped forecasting the end of work Critical theory and political philosophy have turned their attention away from the workplace to focus on other realms of domination and emancipation But far from coming to an end work continues to occupy a central place in our lives This is not only because of the amount of time people spend on the job Many of our deepest hopes and fears are bound up in our labor what

jobs we perform how we relate to others how we might flourish The Return of Work in Critical Theory presents a bold new account of the human significance of work and the human costs of contemporary forms of work organization A collaboration among experts in philosophy social theory and clinical psychology it brings together empirical research with incisive analysis of the political stakes of contemporary work The Return of Work in Critical Theory begins by looking in detail at the ways in which work today fails to meet our expectations It then sketches a phenomenological description of work and examines the normative premises that underlie the experience of work Finally it puts forward a novel conception of work that can renew critical theory s engagement with work and point toward possibilities for transformation Inspired by Max Horkheimer s vision of critical theory as empirically informed reflection on the sources of social suffering with emancipatory intent The Return of Work in Critical Theory is a lucid diagnosis of the malaise and pathologies of contemporary work that proposes powerful remedies
