**Climate Wars** Harald Welzer,2015-02-03

Struggles over drinking water new outbreaks of mass violence ethnic cleansing civil wars in the earth s poorest countries endless flows of refugees these are the new conflicts and forces shaping the world of the 21st century They no longer hinge on ideological rivalries between great powers but rather on issues of class religion and resources The genocides of the last century have taught us how quickly social problems can spill over into radical and deadly solutions Rich countries are already developing strategies to garner resources and keep climate refugees at bay In this major book Harald Welzer shows how climate change and violence go hand in hand Climate change has far reaching consequences for the living conditions of peoples around the world inhabitable spaces shrink scarce resources become scarcer injustices grow deeper not only between North and South but also between generations storing up material for new social tensions and giving rise to violent conflicts civil wars and massive refugee flows Climate change poses major new challenges in terms of security responsibility and justice but as Welzer makes disturbingly clear very little is being done to confront them The paperback edition includes a new Preface that brings the book up to date and addresses the most recent developments and trends

**Necroclimatism in a Spectral World (Dis)order?** Artwell Nhemachena,Munyaradzi Mawere,2019-06-25 Highlighting the problematiques of working with a narrow version of greenhouse effects or global warming this book posits the theory of necroclimatism that encompasses broader versions of greenhouse effects and global warming Conceiving cultures societies moral sensibilities epistemologies polities economies legal systems and religions of the formerly colonised peoples as greenhoused and entrapped in the heat of global apartheid and neo colonialism the book refuses to be confined to the pufferies of physical conceptualisations of greenhousing and global warming Underlining the supposed disposability and dispensability of colonised peoples the notion of necroclimatism explicates ways in which some people suffer various forms of death which have increasingly become a feature of global apartheid and neo colonialism that are cast in spectral sacrificial logics Deemed to constitute disposable bodies disposable cultures disposable polities disposable societies disposable epistemologies disposable religions disposable laws and disposable economies the sacrificed are in the age of climate catastrophism once again reminded that they have duties to die to become extinct in order to save the global spaceship that is sinking due to climate change and global warming This book therefore argues that in a sacrificial world dis order binaries between humans and animals good and evil moral and immoral the dead and the living necessarily vanish in the nefarious logic of what marks the era of climate catastrophism and the attendant necroclimatism The book further argues that a sacrificial world dis order is necessarily a posthumanist and postanthropocentric world dis order which should be never granted space in African worlds and even beyond The book thus raises fundamental questions for African anticipatory regimes and for this reason it is handy for scholars in political science sociology social anthropology development studies environmental studies agricultural

Douglas Kenyon, 2008-02-11 Reveals the cutting edge of New Science and shows how established science disallows inquiry that challenges the status quo even when it produces verifiable results Contains 43 essays by 19 researchers denoting cutting edge heretical or suppressed scientific research including Immanuel Velikovsky Nikola Tesla Rupert Sheldrake and Masaru Emoto Edited by Atlantis Rising publisher J Douglas Kenyon Following the model of his bestselling *Forbidden History* and *Forbidden Religion* J Douglas Kenyon has assembled from his bimonthly journal Atlantis Rising material that explores science and technology that has been suppressed by the orthodox scientific community from the true function of the Great Pyramid and the megaliths at Nabta Playa to Immanuel Velikovsky's astronomical insights free energy from space cold fusion and Rupert Sheldrake's research into telepathy and ESP There is an organized war going on in science between materialistic theory and anything that could be termed spiritual or metaphysical For example Masaru Emoto's research into the energetics of water although supported by photographic evidence has been scoffed at by mainstream science because he has asserted that humans affect their surroundings with their thoughts The materialism or absolute skepticism of the scientific establishment is detrimental to any scientific inquiry that thinks outside the box This mentality is interested in preserving funding for its own projects those that will not rock the establishment From Tesla's discovery of alternating current to Robert Schoch's re-dating of the Sphinx this book serves as a compelling introduction to the true history of alternative and New Science research

*Geoengineering* Mark M. Rich, 2014-06-19 Deadly aerosols that poison the air food and water supplies have been injected into the atmosphere since the late 1940s The program known as geoengineering has been implemented by wealthy eugenicists to deliberately sabotage the planet and commit mass murder By directly poisoning the Earth's life sustaining natural resources geoengineering offers a compound approach to depopulation The ionospheric heaters which are used in conjunction with geoengineering allow for the creation of artificial droughts and floods that are impacting many nations Geoengineering has unleashed fatal climate feedback loops that have set the planet on a doomful course The fallouts and weather attacks further a deceptive gambit for global feudalism known as Agenda 21 With obstructive policies and rising costs they intend to seize private property and herd citizens into megacities with towering prisons that hold hundreds of thousands of people

**Acts of God** Ted Steinberg, 2006-07-20 As the waters of the Mississippi River and Lake Pontchartrain began to pour into New Orleans people began asking the big question could any of this have been avoided How much of the damage from Hurricane Katrina was bad luck and how much was poor city planning Steinberg's *Acts of God* is a provocative history of natural disasters in the United States This revised edition features a new chapter analyzing the failed response to Hurricane Katrina a disaster Steinberg warned could happen when the book first was published Focusing on America's worst natural disasters Steinberg argues that it is wrong to see these tragedies as random outbursts of nature's violence or expressions of divine judgment He reveals how the decisions of business leaders and government officials have

paved the way for the greater losses of life and property especially among those least able to withstand such blows America s poor elderly and minorities Seeing nature or God as the primary culprit Steinberg explains has helped to hide the fact that some Americans are simply better able to protect themselves from the violence of nature than others In the face of revelations about how the federal government mishandled the Katrina calamity this book is a must read before further wind and water sweep away more lives Acts of God is a call to action that needs desperately to be heard
