Human Factors in Transportation Giuseppe Di Bucchianico, Andrea Vallicelli, Neville A. Stanton, Steven J. Landry, 2016-09-19 More and more the most traditional and typical applied ergonomics issues of the activities related to sea shipping vehicle driving and flying are required to deal with some emerging topics related to the growing automatism and manning reduction the ICT's advances and pervasiveness and the new demographic and social phenomena such as aging or multiculturalism. With contributions from expert researchers, professionals and doctoral students from a wide number of countries such as Australia, Austria, Canada, Italy, Germany, the Netherlands, Norway, Sweden, UK and USA, this multi-contributed book will explore traditional and emerging topics of Human Factors centered around the maritime, road, rail and aviation transportation domains.

*Concrete Solutions* Michael Grantham, 2016-09-19 Concrete Solutions contains the contributions from some 30 countries to Concrete Solutions, the 6th International Conference on Concrete Repair, Thessaloniki, Greece, 20-23 June 2016. Strengthening and retrofitting are major themes in this volume with NDT and electrochemical repair following closely, discussing the latest advances and technologies in concrete repair. The book brings together some interesting and challenging theoretical approaches and questions if we really understand and approach such topics as corrosion monitoring correctly. Concrete Solutions is an essential reference work for those working in the concrete repair field, from engineers to architects and from students to clients. The Concrete Solutions Series of international conferences on concrete repair began in 2003 with a conference held in St Malo, France, in association with INSA Rennes. Subsequent conferences have seen the Series partnering with the University of Padua, Italy, in 2009, with TU Dresden, Germany, in 2011, and with Queen's University, Belfast, Northern Ireland, in 2014. In 2016, Thessaloniki, Greece, hosted the conference partnering with both Aristotle University of Thessaloniki, AUTH, and Democritus University of Thrace, DUTH. The next conference in the series will be held in 2019 in Istanbul.

**Men, Masculinities and Disaster** Elaine Enarson, Bob Pease, 2016-06-17 In the examination of gender as a driving force in disasters, too little attention has been paid to how women's or men's disaster experiences relate to the wider context of gender inequality or how gender just practice can help prevent disasters or address climate change at a structural level. With a foreword from Kenneth Hewitt, an afterword from Raewyn Connell, and contributions from renowned international experts, this book helps address the gap. It explores disasters in diverse environmental, hazard, political and cultural contexts through original research and theoretical reflection, building on the under-utilized orientation of critical men's studies. This body of thought, not previously applied in disaster contexts, explores how men gain, maintain and use power to assert control over women. Contributing authors examine the gender terrain of disasters through men's eyes, considering how diverse forms of masculinities shape men's efforts to respond to and recover from disasters and other climate challenges. The book highlights both the high costs paid by many men in disasters and the consequences of dominant masculinity practices for women and marginalized men. It concludes by examining how

disaster risk can be reduced through men's diverse efforts to challenge hierarchies around gender sexuality disability age and culture     *Chemical Biology Editor's Pick 2024* John D. Wade, 2024-12-06 We are pleased to introduce the collection *Frontiers in Chemistry Chemical Biology Editor's Pick 2024* This collection showcases the most well received spontaneous articles from the past couple of years and have been specially handpicked by our Chief Editors The work presented here highlights the broad diversity of research performed across the section and aims to put a spotlight on the main areas of interest All research presented here displays strong advances in theory experiment and methodology with applications to compelling problems     [Advances in Human Aspects of Transportation: Part I](#) Neville Stanton, Giuseppe Di

Bucchianico, Andrea Vallicelli, Steven Landry, 2021-07-19 Human Factors and Ergonomics have made a considerable contribution to the research design development operation and analysis of transportation systems which includes road and rail vehicles and their complementary infrastructure aviation and maritime transportation This book presents recent advances in the Human Factors aspects of Transportation These advances include accident analysis automation of vehicles comfort distraction of drivers understanding of distraction and how to avoid it environmental concerns in vehicle systems design intelligent transport systems methodological developments new systems and technology observational and case studies safety situation awareness skill development and training warnings and workload This book brings together the most recent human factors work in the transportation domain including empirical research human performance and other types of modeling analysis and development The issues facing engineers scientists and other practitioners of human factors in transportation research are becoming more challenging and more critical The common theme across these sections is that they deal with the intersection of the human and the system Moreover many of the chapter topics cross section boundaries for instance by focusing on function allocation in NextGen or on the safety benefits of a tower controller tool This is in keeping with the systemic nature of the problems facing human factors experts in rail and road aviation and maritime research it is becoming increasingly important to view problems not as isolated issues that can be extracted from the system environment but as embedded issues that can only be understood as a part of an overall system     *Nature-based Solutions for Resilient Ecosystems and Societies* Shalini Dhyani, Anil Kumar Gupta, Madhav Karki, 2020-07-07 Over the past few decades the frequency and severity of natural and human induced disasters have increased across Asia These disasters lead to substantial loss of life livelihoods and community assets which not only threatens the pace of socio economic development but also undo hard earned gains Extreme events and disasters such as floods droughts heat fire cyclones and tidal surges are known to be exacerbated by environmental changes including climate change land use changes and natural resource degradation Increasing climate variability and multi dimensional vulnerabilities have severely affected the social ecological and economic capacities of the people in the region who are economically speaking those with the least capacity to adapt Climatic and other environmental hazards and anthropogenic risks coupled with weak and wavering capacities severely
