

## THE BOSTON COUNCIL

RECOMMENDATION: A COUNCIL RESOLUTION CALLING FOR THE CANCELLATION OF THE BOSTON COUNCIL'S

CONFIDENTIALITY AGREEMENTS WITH THE BOSTON CITY COUNCIL

RECOMMENDED BY: THE BOSTON COUNCIL'S BUDGET & TAXES

1. The Boston City Council has a longstanding history of public access and transparency that makes it a priority for everyone to fully understand our actions. When the Boston City Council signed a confidentiality agreement with the Boston Police Department in 2013, it violated the public's right to know. This agreement has been used to keep Boston Police Department records from the public, including the names of Boston Police officers and the names of the Boston Police officers involved in the shooting of Martin Richard.

Today, the public is still learning the Boston Police shooting of Martin Richard and the Boston Police Department's role in that shooting. The Boston Police Department, like many other police departments across the country, has a history of not releasing records that could help the public understand how and why these tragic events occurred. This is unacceptable.

1. The Boston City Council should cancel the Boston Police's confidentiality agreement with the Boston Police Department.

Absence of gravity results in the loss of many familiar kinesthetic cues of weight and friction necessary to man for object discrimination and manipulation Man's ability to discriminate small differences in mass as opposed to small differences in weight was studied Four weight series were used each consisting of a standard 1000 3000 5000 or 7000 grams and nine comparison stimuli Judgments for mass differences were made with the same weights supported by compressed air on an air bearing table Thus the frictionless aspect of a weightless environment was simulated Results show that the mean difference limen mean standard deviation and Weber ratio S/S for each standard are much larger for mass than for weight Thus to be detected under a weightless condition mass increments must be at least twice as large as the weight increments required for discrimination in a normal weight lifting situation Abstract **8.01 Presentation in Weightlessness** Peggy Joy Hollermann, 2000 **Weightlessness - Zero Gravitation** United States.
