Gaming

During the early 1950s, only one type of video game was available: simple games made up of a cathode ray tube. They were not popular and were only available in research labs and universities. However, things changed in the 1970s with the arrival of arcade games such as Pong. The success of these games led people to invent a home console and computers. Over time, gaming has become increasingly popular.

Pong

The first home console was the Magnavox Odyssey, which was released in 1972. It was the first popular console that allowed users to play lots of different games. It was a huge success and it helped to lay the foundation for the modern video game industry.
