## **Web Document Analysis Challenges And Opportunities:**

**Web Document Analysis** Apostolos Antonacopoulos, Jianying Hu, 2003 This book provides the first comprehensive look at the emerging field of web document analysis. It sets the scene in this new field by combining state of the art reviews of challenges and opportunities with research papers by leading researchers. Readers will find in depth discussions on the many diverse and interdisciplinary areas within the field including web image processing, applications of machine learning and graph theories, fat content extraction and web mining, adaptive web content delivery, multimedia document modeling and human interactive proofs for web security. **Digital Document Processing** Bidyut B. Chaudhuri, 2007-03-13 In this book all the major and frontier topics in the field of document analysis are brought together into a single volume creating a unique reference source. Highlights include Document structure analysis followed by OCR of Japanese, Tibetan and Indian printed scripts. Online and offline handwritten text recognition approaches, Japanese postal and Arabic check processing, Document image quality modelling, mathematical expression recognition, graphics recognition, document information retrieval, super resolution text metadata extraction in digital library, Biometric and forensic aspects, individuality of handwriting detection. Web document analysis, text and hypertext mining and bank check data mining. Containing chapters written by some of the most eminent researchers active in this field, this book can serve as a handbook for the research scholar as well as a supporting book for advanced graduate students interested in document processing or image analysis.

## **Machine Learning and Data Mining in Pattern Recognition** Petra Perner, Azriel Rosenfeld, 2003-06-25

The International Conference on Machine Learning and Data Mining (MLDM) is the third meeting in a series of biennial events which started in 1999 organized by the Institute of Computer Vision and Applied Computer Sciences (IBAI) in Leipzig. MLDM began as a workshop and is now a conference and has brought the topic of machine learning and data mining to the attention of the research community. Seventy seven papers were submitted to the conference this year. The program committee worked hard to select the most progressive research in a fair and transparent review process which led to the acceptance of 33 papers for presentation at the conference. The 33 papers in these proceedings cover a wide variety of topics related to machine learning and data mining. The two invited talks deal with learning in case based reasoning and with mining for structural data. The contributed papers can be grouped into nine areas: support vector machines, pattern classification, decision trees, clustering, classification and retrieval, case based reasoning, Bayesian models and methods, association rules and applications. We would like to express our appreciation to the reviewers for their precise and highly professional work. We are grateful to the German Science Foundation for its support of the Eastern European researchers. We appreciate the help and understanding of the editorial staff at Springer Verlag and in particular Alfred Hofmann who supported the publication of these proceedings in the LNAI series. Last but not least we wish to thank all the speakers and participants who contributed to the success of the conference.

## **Structural, Syntactic, and Statistical Pattern**

**Recognition** Ana Fred, Terry Caelli, Robert P.W. Duin, Aurélio Campilho, Dick de Ridder, 2004-07-28 This book constitutes the refereed proceedings of the 10th International Workshop on Structural and Syntactic Pattern Recognition SSPR 2004 and the 5th International Workshop on Statistical Techniques in Pattern Recognition SPR 2004 held jointly in Lisbon Portugal in August 2004. The 59 revised full papers and 64 revised poster papers presented together with 4 invited papers were carefully reviewed and selected from 219 submissions. The papers are organized in topical sections on graphs, visual recognition and detection, contours, lines and paths matching and superposition, transduction and translation, image and video analysis, syntactics, languages and strings, human shape and action sequences, and graphs pattern matching and classification, document image analysis, shape analysis, multiple classifier systems, density estimation, clustering, feature selection, classification and representation.

*Sustainable Development and the Digital Economy* Mohammad Nabil

Almunawar, Patricia Ordóñez de Pablos, Muhammad Anshari, 2023-10-06 The advancement of technology such as data analytics and artificial intelligence AI has led to the birth of Industry 4.0 in which technology seems to be the centre of development. However, as the Covid 19 pandemic created havoc, the entire world production chain has been seriously affected, highlighting that machines alone, although fully connected and automated, cannot function without people. This book addresses the pillars of moving towards Industry 5.0 for sustainable development, drawing on examples from Asia. As Asian nations are moving fast toward the digital economy, this edited collection offers new perspectives on understanding emerging business opportunities as well as the challenges faced. Chapters span the three pillars of Industry 5.0: human centricity, sustainability, and resilience, and includes topics related to people management for creating wealth, technology advancements in supporting creativity, resilience, and agility of organisations, as well as the important issue of sustainability in future industrial development. With rich empirical studies from leading researchers, this book will be a reference for academics and scholars across business disciplines, including information technology and innovation management, organisational and strategic management, as well as those interested in industrial development and sustainability.
