

# Beginner's Guide to website design and development

## 1. Websites

A website comprises a collection of web pages accessible via the Internet, much like the one you're viewing now. Each web page is what you see displayed on your screen when you enter a web address, click on a link, or perform a search engine query. These pages can host a variety of content, including text, colors, videos, graphics, animations, and sounds.

When someone provides you with a web address, it typically leads to the home page of their website. The home page serves as an introduction, showcasing what the site offers in terms of information or services. From there, users can navigate to other sections of the site through clickable links. Depending on the site owner's objectives, a website may consist of a single page or hundreds of pages.
