**Continuing Engineering Education for a Sustainable Future** Patricia Caratozzolo, Angeles Dominguez, Bente Nørgaard, Guillermo M. Chans, 2025-08-06. The World Economic Forum stated in its 2023 Future of Jobs report that 44% of workers' skills will change in the next five years. Additionally, six out of ten workers will require training before 2027, and only half will have adequate training opportunities. With this in mind, the three most pressing challenges currently facing the Continuing Engineering Education (CEE) community include: 1. The shifting skill requirements dictated by the job market. Engineering roles in various sectors are evolving, demanding a mix of Knowledge, Skills, and Abilities (KSA) that is difficult to predict with certainty. 2. The climate change mitigation and adaptation. Engineers must reskill and adapt to changing sustainability requirements, and educational programs must support this transition. 3. The underrepresentation of minorities. Women, racial and ethnic minorities, and individuals with disabilities face disparities in opportunities, mentorship, and inclusion.
