practise that supports the NCTM's vision of more and better mathematics for all children. This book expounds on that framework explicating the roles of teachers, supervisors, teacher educators, mathematicians, professional developers, parents, politicians, community members and others in improving the teaching and learning of mathematics. The Standards offer a vision for high quality mathematics teaching and support structures for teachers. What matters in the long run, however, is how classrooms across North America are transformed and how teaching practises evolve to address the mathematical learning needs of children.

For parents of children with Autism, ADHD, or learning disabilities, the daily battle can be exhausting. The Unstuck Brain is the compassionate, practical roadmap you've been searching for. Written by Abhijeet Sarkar, CEO/Founder of Synaptic AI Lab, this book bridges a deep understanding of brain science with the real-world, actionable strategies you need to transform your home life and become your child's most effective advocate.
