Reshaping STEM Education: Strategies for Curriculum Decolonization and Institutional Transformation Zahid Pranjol, Alia Amir, 2025-11-13 The field of STEM higher education is currently grappling with the imperative need for transformative discourse to address its historical epistemological and colonial underpinnings Despite significant advancements in STEM disciplines there remains a critical gap in inclusivity and equity within higher educational institutes

Recent studies have highlighted the persistent colonial structures that shape STEM education often marginalizing diverse voices and perspectives. Efforts to decolonize STEM education are gaining momentum yet there is a pressing need for comprehensive research and reflective insights to uproot these entrenched structures. This research topic aims to address these gaps by fostering a robust dialogue that transcends traditional boundaries promoting a deeper understanding of the challenges and opportunities in reshaping STEM education through decolonial lenses. This research topic aims to provide a scholarly platform for researchers, educators, and practitioners to contribute groundbreaking research and reflective insights on decolonizing STEM higher education. The primary goal is to facilitate a robust dialogue that transcends traditional boundaries fostering a deeper understanding of the challenges and opportunities in reshaping STEM education through decolonial lenses.

Action Research S. Michael Putman, Tracy Rock, 2016-12-29 Action Research Using Strategic Inquiry to Improve Teaching and Learning helps educators use research to guide decision making and determine the effectiveness of various instructional strategies. The book leads the reader through the action research process using a model of self regulation which focuses on task definition, goal setting and planning, enacting research and adaption. Written specifically for educators who may not feel prepared to measure the impact of interventions on student learning outcomes, the book provides very practical and useful tools containing specific examples that are relevant to teachers everyday reality. The text also reinforces how action research can improve the teaching and learning process by reinforcing or changing perceptions about the use of informal data including anecdotal notes or observations in the research process.

Science Activities for Middle School Students George C. Lorbeer, 2000 Science Activities for Middle School Students a revision of George Lorbeer and Leslie Nelson's classic Science Activities for Children gives instructors practical fun hands on learning activities to help teach children about science and problem solving skills. Each activity follows the same step by step format: Problem, Procedure, Result, Supplemental Information, and Thought Questions. The activities are accompanied by simple illustrations that help clarify procedures and expected results. With a total of nearly 300 activities, future science teachers will find a wealth of ideas to help them become more effective in the classroom. Science Activities for Middle School Children contains more challenging higher level science activities such as ones about the Greenhouse Effect, the Icehouse Effect, Ozone Depletion, and the Eutrophication of some of our fresh water supplies. The text is an excellent and comprehensive resource that future and practicing teachers of elementary science will want to keep at arm's length for ready reference.
