[Guide to Numerical Algorithm Design and Development](#) George Delic, 2025-10-27. The focus of this unique textbook reference is on numerical algorithms that are stable and provide high precision in common numerical problems encountered in large scale modeling projects. The techniques presented are based on algorithms developed by the author over six decades of research and publications in peer-reviewed journals. The exposition includes topics typical of numerical analysis courses and is supplemented with examples of algorithms demonstrated in an engineering worksheet that is easy to read and comprehend. Each chapter ends with exercises and programming problems. Additional examples are available as downloadable Fortran code based on the author's large scale models in computational physics. The limitations of commodity processors and modern compilers is discussed with advice provided on how to control them in an algorithm's code design. An ample bibliography of over 200 citations provides a guide to further reading. Topics features and emphases if supportLists endif. Stability knowing the range of algorithm parameters for producing reliable results if supportLists endif. Accuracy understanding convergence to a result through quantitative

metrics if supportLists endif Precision advance knowledge of the expected numerical precision and how to control it if supportLists endif Efficiency translating an algorithm into code with limited redundant computation The primary target audience of this textbook guide are senior graduate or postgraduate students in computer science and scientific or engineering fields who are starting on a career path as the next generation of model developers for high performance computing HPC Additionally the book will appeal to professionals engaged in large scale computer model development who could use the volume as a course supplement or reference The author is an Honorary Fellow of the University of Wollongong New South Wales Australia He is active as a private consultant in HPC and CEO of HiPERiSM Consulting LLC in the United States of America
