Mechatronics and Intelligent Systems for Off-road Vehicles Francisco Rovira Más, Qin Zhang, Alan C. Hansen, 2010-11-30  
Rapid developments in electronics over the past two decades have induced a move from purely mechanical vehicles to mechatronics design. Recent advances in computing sensors and information technology are pushing mobile equipment design to incorporate higher levels of automation under the novel concept of intelligent vehicles. Mechatronics and Intelligent Systems for Off road Vehicles introduces this concept and provides an overview of recent applications and future approaches within this field. Several case studies present real examples of vehicles designed to navigate in off road environments typically encountered by agriculture, forestry and construction machines. The examples analyzed describe and illustrate key features for agricultural robotics such as automatic steering, safeguarding, mapping and precision agriculture applications. The eight chapters include numerous figures each designed to improve the reader's comprehension of subjects such as automatic steering systems, navigation systems, vehicle architecture, image processing and vision and three dimensional perception and localization. Mechatronics and Intelligent Systems for Off road Vehicles will be of great interest to professional engineers and researchers in vehicle automation, robotics and the application of artificial intelligence to mobile equipment as well as to graduate students of mechanical, electrical and agricultural engineering. Mechatronics William Bolton, 2018. The integration of electronic engineering, mechanical engineering, control and computer engineering. Mechatronics lies at the heart of the innumerable gadgets, processes and technology without which modern life would seem impossible. From auto focus cameras to car engine management systems and from state of the art robots to the humble washing machine, Mechatronics has a hand in them all. **Solutions Manual for Mechatronics** Clarence W De Silva, de Silva Clarence W., 2004-09.
