Experimental and Efficient Algorithms Celso C. Ribeiro, Simone L. Martins, 2004-05-11 This book constitutes the refereed proceedings of the Third International Workshop on Experimental and Efficient Algorithms WEA 2004 held in Angra dos Reis Brazil in May 2004. The 40 revised full papers presented together with abstracts of two invited talks were carefully reviewed and selected from numerous submissions. The book is devoted to the areas of design analysis and experimental evaluation of algorithms. Among the topics covered are scheduling, heuristics, combinatorial optimization, evolutionary optimization, graph computations, labeling, robot navigation, shortest path algorithms, flow problems, searching, randomization and derandomization, string matching, graph coloring, networking, error detecting codes, timetabling, sorting, energy minimization, etc.

Algorithms in a Nutshell George T. Heineman, Gary Pollice, Stanley Selkow, 2008-10-14 Creating robust software requires the use of efficient algorithms, but programmers seldom think about them until a problem occurs. Algorithms in a Nutshell describes a large number of existing algorithms for solving a variety of problems and helps you select and implement the right algorithm for your needs with just enough math to let you understand and analyze algorithm performance. With its focus on application rather than theory, this book provides efficient code solutions in several programming languages that you can easily adapt to a specific project. Each major algorithm is presented in the style of a design pattern that includes information to help you understand why and when the algorithm is appropriate. With this book you will:

- Solve a particular coding problem or improve on the performance of an existing solution.
- Quickly locate algorithms that relate to the problems you want to solve and determine why a particular algorithm is the right one to use.
- Get algorithmic solutions in C, C, Java, and Ruby with implementation tips.
- Learn the expected performance of an algorithm and the conditions it needs to perform at its best.
- Discover the impact that similar design decisions have on different algorithms.
- Learn advanced data structures to improve the efficiency of algorithms.
