Devaluing Public Apologies in the Age of Social Media Joshua M. Bentley,2024-12-15 In Devaluing Public Apologies in the Age of Social Media Joshua M Bentley argues that apologies are losing their meaning in American society as organizations and public figures treat them as strategical tools without considering their ethical implications As the demand for apologies in the age of social media continues to increase exponentially Bentley posits the apologies that are given carry less and less weight to the public This book examines how controversial figures like Donald Trump and Joe Rogan as well as brands like Google and Bud Light have addressed public controversies both effectively and ineffectively illustrating how social media polarization and cancel culture are changing the way apologies are given and received If apologies are to serve their historical role of resolving conflict peacefully Bentley argues they must be placed back into their proper ethical context This book offers insight on how individuals and organizations can ensure their apologies reflect their authentic values Scholars of communication ethics media studies political science and public relations will find it especially useful

**Rethinking Free Speech** Peter Ives,2024-11-12T00:00:00Z Clashes over free speech rights and wrongs haunt public debates about the state of democracy freedom and the future While freedom of speech is recognized as foundational to democratic society its meaning is persistently misunderstood and distorted

Prominent commentators have built massive platforms around claims that their right to free speech is being undermined. Critics of free speech correctly see these claims as a veil for misogyny, white supremacy, colonialism, and transphobia, concluding it is a political weapon to conserve entrenched power arrangements. But is this all there is to say? Rethinking Free Speech will change the way you think about the politics of speech and its relationship to the future of freedom and democracy in the age of social media. Political theorist Peter Ives offers a new way of thinking about the essential and increasingly contentious debates around the politics of speech. Drawing on political philosophy, including the classic arguments of JS Mill, and everyday examples, Ives takes the reader on a journey through the hotspots of today's raging speech wars. In its bold and careful insights on the combative politics of language, Rethinking Free Speech provides a map for critically grasping these battles as they erupt in university classrooms, debates around the meaning of antisemitism, the cancelling of racist comedians, and the proliferation of hate speech on social media. This is an original and essential guide to the perils and possibilities of communication for democracy and justice. Autobiography, Fan Fiction, and Education Nicola Robertson, Yueling Chen, 2025-10-02. This book illuminates the relationship between autobiography, fan fiction, and education via philosophical, pedagogical, and formative perspectives. How might we consider autobiography and fan fiction writing to be educational? How can we harness the potential of fan fiction writing for pedagogical use? How does the practice of creating and consuming fan fiction autobiographical texts support the formation of identity? This book brings together contributors from across the world to consider the answers to these questions and more, with the resulting interpretations and perspectives offering something novel in the linking of these three concepts. Separated into three distinct sections, the chapters in this book look first at philosophical perspectives, moving on to pedagogical approaches, and finally the role of fan fiction and autobiography in the formation of individual and social identities. The eclectic mix of arguments, methods, and styles aims to provide insights to

readers interested in life writing popular culture and media studies and those engaged in the multiple sub disciplines of education studies

In Terry's bestselling book *My Best Mistake*, he uncovers the surprising power of screwing up. Now he turns his incredible eye to the mavericks who go against the grain in their work to see what makes them tick and to explore what lessons we can learn from them. People who chose to ignore conventional wisdom, found or invented a better way, questioned the status quo at great sacrifice, and pushed for change against all odds. Some were drummed out of their careers for it, but in the end, were proven right. Dr. Ignaz Semmelweis. Some were celebrated but had to fight every inch of the way. Norman Lear. Some re-invented their industry but preferred to stay an outsider. Tom Laughlin, aka Billy Jack. Some confounded their competitors with ingenious strategies. NHL coach Roger Neilson. One even saved millions of people around the world but was humiliated, demoted, and dismissed for her entire career. Dr. Katalin Karikó, co-creator of the COVID vaccine. All persistent visionaries, each covered in battle scars.
